1. Introduction

In November 2022, San Francisco voters approved Proposition L (Prop L), extending the ½-cent sales tax to fund transportation improvements and approving a new 30-year Expenditure Plan, which superseded the prior Proposition K Expenditure Plan. The Prop L Expenditure Plan determines eligibility for sales tax funds through a list of 28 programs. It also sets caps for the maximum amount of Prop L funds that will be available for specific programs over the 30-year Expenditure Plan period, totaling up to an estimated \$2.6 billion (2020 \$'s). In order to fully fund the programs, the Expenditure Plan assumes that the Prop L dollars will leverage (or match) another \$23.7 billion (2020 \$'s) in other federal, state, regional, and local funds for a total program cost of \$26.3 billion (2020 \$'s). Some of those leveraged funds will be distributed to San Francisco through funding formulas. In other cases, San Francisco project sponsors will have to aggressively compete for discretionary funds in order to fully fund the Expenditure Plan programs.

The Expenditure Plan includes a number of requirements, including the development of 5-Year Prioritization Programs (5YPPs) as a condition for receiving allocations in each program in the Expenditure Plan. The 5YPPs are intended to provide a stronger link between project selection and expected project performance, to support on time, on-budget project delivery, and optimize use of federal, state and regional matching funds. Other major benefits of the 5YPPs include:

- Provide transparency about how Prop L projects are prioritized,
- Enable public input early and throughout the planning process, and
- Improve agency coordination within and across projects at the earlier stages of the planning process.

The desired outcome of the 5YPPs is the establishment of a strong pipeline of grant-ready transportation projects that can be advanced as soon as funds (including Prop L, federal, state, and other funds) are available. The 5YPPs are critically important to help achieve the leveraging needed to fully fund the Expenditure Plan programs.

As its centerpiece, each 5YPP contains a 5-year Program of Projects (or project list), ideally including project descriptions, schedule milestones, cost estimates, and full funding plans showing Prop L funds by fiscal year and other matching funds. The Program of Projects (project list) for Street Resurfacing, Rehabilitation, and Maintenance is contained in Section 7 of this document.

2. Eligibility and Expected Fund Leveraging

2.1 | ELIGIBILITY

Eligibility for the Street Resurfacing, Rehabilitation, and Maintenance program as identified in the voter approved Prop L Expenditure Plan is as follows, with amounts shown in millions of 2020 dollars:

"Repaving and reconstruction of city streets to prevent deterioration of the roadway system, based on an industry-standard pavement management system designed to inform cost-effective roadway maintenance. May include sidewalk rehabilitation and curb ramps and elements to improve resilience to climate change. Includes project development and capital costs. Sponsor Agency: SFPW. Total Funding: \$1,952M; EP: \$88M.

Replacement of street repair and cleaning equipment according to industry standards, including but not limited to asphalt pavers, dump trucks, sweepers, and front-end loaders. Includes capital costs only. Sponsor Agency: SAS. [SFPW]. Total Funding: \$32M; EP: \$17M."

SFPW stands for San Francisco Public Works, and SAS stands for Department of Sanitation and Streets. In the November 8, 2022 election, San Francisco voters approved Prop B, retaining the Sanitation and Streets Commission, but eliminating the Department of Sanitation and Streets and transferring its duties back to San Francisco Public Works.

2.2 | EXPECTED FUND LEVERAGING

Leveraging Prop L funds against non-Prop L fund sources is necessary to fully fund the Expenditure Plan programs. Prop L sales tax funds will be used as seed funding for planning and project development to make projects competitive for discretionary fund sources, and to serve as local match needed to secure federal, state, regional, and other grant funding.

Based on Priority 1 (conservative forecast) funding levels for the Street Resurfacing, Rehabilitation, and Maintenance program, the Prop L Expenditure Plan assumes that for every \$1 of sales tax revenue spent, on average it would be leveraged by about \$17.90 in non-Prop L funds. The Transportation Authority reviews leveraging at the project and project phase (e.g. planning, design, construction) level as well as for each Expenditure Plan program as a whole.

3. Public Engagement

Transportation Authority staff conducted public engagement to inform the development of the 5YPPs. This section summarizes feedback heard from that engagement, as well as information provided by project sponsors regarding public engagement and community support.

During the Prop L Expenditure Plan development, the Transportation Authority conducted a robust outreach process from Spring 2021 - Winter 2022. The New Expenditure Plan for San Francisco's Half-Cent Sales Tax for Transportation: Outreach Findings report can be found on the Transportation Authority website. Key themes emerged from this process including feedback that resurfacing streets was essential for all modes including bikes and transit, and that potholes present safety concerns for cyclists and make it difficult for those with disabilities to ride the bus if the ride is too bumpy. We also heard feedback that SFPW should prioritize paving on streets that have bicycle facilities.

As part of development of the 2023 5YPPs, the Transportation Authority conducted outreach and hosted public meetings to gather input about which specific projects and project types should be funded through Prop L in the next five years and to seek input on how to select projects for each Expenditure Plan program. The meetings included a virtual meeting for interested members of the former Expenditure Plan Advisory Committee who helped develop Prop L and representatives of equity-focused community-based organizations; a virtual town hall; and presentations at community group meetings, as requested. There was also an online multi-lingual survey and opportunities for public input through the Transportation Authority's website and at multiple Transportation Authority Community Advisory Committee and Transportation Authority Board meetings. The Transportation Authority website also includes a list of staff contacts to facilitate public engagement directly with project sponsors.

To learn more, visit sfcta.org/ExpenditurePlan. The findings from the 5YPP outreach process will be published on this webpage in September 2023.

4. Performance Measures

Prop L requires the establishment of performance measures for each program in the Expenditure Plan. The intent is to demonstrate the system performance benefits of sales tax projects (e.g. reduced transit travel time), to ensure funds are being used cost effectively, and to inform programming of future Prop L funds, as well as programming and prioritization of other funds by the Transportation Authority (e.g. Transportation Fund for Clean Air, Prop AA Vehicle Registration Fee funds).

After reviewing San Francisco's Congestion Management Program and consulting with eligible sponsoring agencies, the Transportation Authority recommends that the following performance measures be applied to projects included in the Street Resurfacing, Rehabilitation, and Maintenance 5YPP:

Pavement Condition Index (PCI) score (citywide for SFPW streets)

While not recommended as a performance measure, the Transportation Authority will also track the following metrics for this program to understand trends:

Number of city blocks repaved

5. Project Delivery Snapshot

Since this is the inaugural Prop L 5YPP, we are looking to the prior Prop K sales tax program to assess project delivery trends for similar types of projects. Project delivery for previously funded projects is one important consideration when we evaluate project sponsors' proposed requests for Prop L funding, particularly with respect to project readiness.

As required by the Prop L Expenditure Plan, the next 5YPP update will be informed by a citywide geographic distribution of sales tax project allocations and the distribution of projects located in Equity Priority Communities and/or benefiting disadvantaged populations.

Prop K Project Delivery

Prop K has funded Street Resurfacing, Rehabilitation, and Maintenance since 2004.

Table 1 shows the Project Status of open Street Resurfacing, Rehabilitation, and Maintenance grants under Prop K.

Table 1. Prop K Project Status

SPONSOR	PROJECT NAME	PHASE(S) FUNDED	FY OF ALLOCATION	ALLOCATED (AS OF JUNE 2023)	REMAINING BALANCE (AS OF 6/6/23)	OPEN FOR USE?
SFPW	Potrero Avenue Pavement Renovation	Construction	2013/14	\$4,413,014	\$590,294	Yes
SFPW	Haight Street Resurfacing and Pedestrian Lighting	Construction	2016/17	\$1,248,251	\$67,771	Yes

SPONSOR	PROJECT NAME	PHASE(S) FUNDED	FY OF ALLOCATION	ALLOCATED (AS OF JUNE 2023)	REMAINING BALANCE (AS OF 6/6/23)	OPEN FOR USE?

SFPW	Junipero Serra Blvd Pavement Renovation	Construction	2021/22	\$4,397,129	\$4,397,129	
SFPW	Mission and Geneva Pavement Reconstruction	Construction	2021/22	\$1,093,827	\$1,093,827	
SFPW	Sunset Blvd Pavement Renovation	Construction	2022/23	\$3,100,000	\$3,100,000	
SFPW	Street Repair and Cleaning Equipment	Construction	2015/16	\$738,072	\$23,682	
SFPW	Street Repair and Cleaning Equipment	Construction	2019/20	\$1,294,294	\$32,048	Yes
SFPW	Street Repair and Cleaning Equipment	Construction	2019/20	\$871,364	\$704,170	
SFPW	Street Repair and Cleaning Equipment	Construction	2020/21	\$908,990	\$908,990	
SFPW	Street Repair and Cleaning Equipment	Construction	2022/23	\$983,021	\$983,021	
Б						

Projects are sorted by sub-program, allocation year, then name.

One of the main project delivery challenges for SFPW's street resurfacing program is the necessary coordination with City agencies and private companies (e.g., utility companies) for street resurfacing projects. To minimize disruption to the public during construction, paving projects often become part of contracts covering other scopes of work in addition to paving, or SFPW may coordinate their paving contracts with other agency contracts such as those led by SFMTA and SFPUC. SFPW issues Notices of Intent to alert partners of the potential need to coordinate work, attends the City's interagency coordination meetings to facilitate information sharing and coordination, and hosts project-specific coordination meetings to finalize scope decisions before detailed design is completed.

SFPW has experienced very long lead times for procuring equipment over the last 3 years due to supply chain shortages largely fueled by pandemic-related issues. SFPW

has ordered all of the equipment funded through FY23 but has not received the equipment yet.

SFPW has been experiencing accounting staff resource issues exacerbated by the pandemic which has slowed billing and explains the remaining balances on many completed and underway projects.

6. Project Prioritization

The intent of establishing and documenting a methodology to select proposed projects is to provide the Transportation Authority Board, the public, and project sponsors with a clear understanding of how projects are prioritized for funding within each Prop L program. Working in consultation with project sponsors and drawing upon the Transportation Authority's experience with prioritizing projects for grant funding, Transportation Authority staff developed a set of Prop L program-wide criteria to help select projects in each of the 28 Prop programs. In addition, most programs also have program-specific criteria to inform priorities such as improving transit reliability and travel time or replacing assets at the end of their useful lives. The Prop L program-wide criteria include:

- Project Readiness
- Relative Level of Need or Urgency
- Benefits to Disadvantaged Populations
- Level and Diversity of Community Support
- Leveraging

The above criteria, along with any program-specific criteria, are scored for each proposed project. In addition, the evaluation process also considers a fair geographic distribution and cost-effectiveness.

San Francisco's <u>Equity Priority Communities</u> are an important factor in assessing projects and benefits to disadvantaged populations. See the map on the Transportation Authority's website: https://epc-map.sfcta.org/.

The Project Scoring Table in Section 7 shows the Prop L program-wide criteria, the program-specific criteria, criteria definitions, and maximum possible points for projects proposed for the Street Resurfacing, Rehabilitation, and Maintenance 5YPP. For each proposed project, the project sponsors first scored the project and then Transportation Authority staff reviewed and refined the scoring, as needed, to ensure consistent application of the prioritization criteria.

7. Project List

This section shows how each project proposed for funding from this program ranked based on the prioritization methodology described in Section 6; the 5-Year Program of Projects or project list recommended for Prop L funds; and Anticipated Leveraging. The Project Information Forms with details on scope, schedule, cost, funding are included in Appendix A.

As shown in the project list, SFPW has not requested advancement of funds beyond the pay-go amounts in the Strategic Plan Baseline for the Street Resurfacing, Rehabilitation, and Maintenance program.

	Prop L-Wide Criteria						Pro			
District	Projects	Project Readiness	Relative Level of Need or Urgency (time sensitive)	Benefits to Disadvantaged Populations	Level and Diversity of Community Support	Leveraging	Pavement Safety Condition Index		Multi-Modal Benefits	Total
Repaving an	d Reconstruction of City Streets (sub	-program)

	Level and Diversity of Community S community-based planning process.	Support: Highest	possible score is 5	. Project has clear ar	nd diverse commu	ınity support, inclu	ding from disadv	antaged populatio	ns and/or was dev	eloped out of a
	Five points for a project that 1) is in an adopted community based plan or with evidence of diverse (neighborhood level and citywide) community support and 2) has documented support from disadvantaged populations. Three points for a project not in an adopted community based plan, but with evidence of support from both neighborhood stakeholders and citywide groups. Project does not have documented support from disadvantaged populations. One point for a project not in an adopted community based plan, but with evidence of support from either neighborhood stakeholders or citywide groups. Project does not have documented support from disadvantaged populations. Zero points for a project that was not developed out of a community-based planning process or did not have other forms of demonstrated community support.									
	Leveraging: Highest possible score is sources and the likely competitivenes	s 4. Project demo	nstrates actual or p	ootential leveraging	of Prop L funds, as				lude the status of c	other fund

Repaving and Reconstruction of City Streets - Safety: Highest possible score is 4. Project includes streets on the High Injury Network.
Repaving and Reconstruction of City Streets - Pavement Condition Index: Highest possible score is 4. Project includes streets with identified maintenance requirements based on the Pavement Condition Index. Streets are categorized as requiring pavement preservation (PCI 60-80), resurfacing (PCI 50-60), or paving with base repair/reconstruction (PCI 0-50). Projects with a PCI score of 60 or below will receive higher priority.
Repaving and Reconstruction of City Streets - Multi-Modal Benefits: Highest possible score is 4. Streets that are transit routes and/or bicycle routes will receive higher priority.
Replacement of Street Repair and Cleaning Equipment - Safety : Highest possible score is 4. Project improves or mitigates a documented unsafe condition for employees. Points are based on the safety information presented in the Project Information Form.
Replacement of Street Repair and Cleaning Equipment - Need : Highest possible score is 3. Projects that are replacing assets at the end of their useful life will be prioritized. Clean fuel vehicles shall be considered if feasible.

2023 Prop L 5-Year Project List (FY 2023/24 - FY 2027/28) 15- Street Resurfacing, Rehabilitation, and Maintenance Programming Year

Pending July 25, 2023 Board Meeting

				Fisca	Year of Alloc	ation		
Agency	Project Name	Phase	2023/24	2024/25	2025/26	2026/27	2027/28	Total

Cumulative Remaining Ca	sh Flow Capacity	\$703,869	\$471,606	\$1,104,344	\$1,312,082	\$1,819,819	\$699,819	(\$181)	(\$181)

Anticipated Leveraging

The table below compares Prop L Expenditure Plan assumptions with anticipated leveraging for the recommended projects based on the Project Information Forms. At time of allocation, Transportation Authority staff will again compare the actual leveraging to the expected leveraging.

Table 2. Prop L Leveraging: Expected vs. Proposed for Fiscal Years 2023/24 - 2027/28

PROGRAM	EXPECTED LEVERAGING IN EP (NON-PROP L FUNDS)	ANTICIPATED LEVERAGING (NON-PROP L FUNDS)
Street Resurfacing, Rehabilitation, and Maintenance (overall)	94.7%	64.0%/97.6%1
Repaving and Reconstruction of City Streets (sub-program)		64.9%
Street Repair and Cleaning Equipment (sub-program)		17.6%

¹64.0% is for the recommended program of projects. 97.6% reflects the anticipated full 5-year street resurfacing program, including Prop L and non-Prop L funded projects.

Expected leveraging for the Street Resurfacing, Rehabilitation, and Maintenance program over the life of the 30-year measure is 94.7%, which is based on the leveraging for the entire street resurfacing program (all funding sources including gas tax subventions, Prop AA, etc.). Based on the PIFs, the anticipated leveraging is good for the proposed projects with paving projects averaging 64%. Anticipated leveraging for the full 5 year street resurfacing program, including Prop L and non-Prop L funded projects, exceeds the leveraging assumptions for the program at 98%. The full 5-year street resurfacing program funding plan is shown in Appendix C.

The FY2023/24 Project Information Form shows the anticipated General Fund amount for the Street Repair and Cleaning Equipment with leveraging of 88%. There are few options beyond the sales tax and General Fund for funding street cleaning and repair equipment, resulting in 0% leveraging for equipment projects. We will work with SFPW to identify potential discretionary funding opportunities for equipment projects such as those that replace gas or diesel-powered vehicles with electric-powered vehicles.

considerations for climate	
adaptation and resilience (if	The project schedule will be coordinated with other projects and agencies as work
relevant), and coordination with	programs are determined to minimize construction impacts to the City. SFPW is actively
other projects in the area (e.g.	coordinating with SFPUC Wastewater as an agency that will have joint work into the
paving, Vision Zero).	paving project.
	SFPW inspects each of the City's blocks and assigns a Pavement Condition Index (PCI)
	score every two years. The PCI score ranges from a low of 0 to a high of 100. These scores
	assist SFPW with implementing the pavement management strategy of aiming to
	preserve streets by applying the right treatment to the right roadway at the right time.
	Streets are selected based on PCI scores as well as the presence of transit and bicycle
	routes, street clearance (i.e., coordinatiion with utilities) and geographic equity. The
	average PCI score within the project limits is mid 50's.
	<u> </u>
	All candidates shown are subject to substitution and schedule changes pending, visual
	confirmation, utility clearances and coordination with other agencies. Unforeseen
	challenges such as increased work scope, changing priorities, cost increases or declining
	revenue may arise causing the candidates to be postponed.
	,

Prop L Supplemental Information Please fill out each question listed below (rows 2-8) for all projects.							
Project Name	Geary Boulevard Improvements Project Phase 2						
Relative Level of Need or Urgency (time sensitive)	Project is time sensitive due pavement resurfacing needs and coordination with other agencies.						
Prior Community Engagement/Level and Diversity of Community Support (may attach Word document):							
Benefits to Disadvantaged Populations and Equity Priority Communities	The resurfacing project is in/adjacent to Equity Priority Communities (as defined by the San Francisco County Transportation Authority). Resurfacing of roads provides a smoother street for all modes of transportation, including buses, private vehicles, bicyclists, skateboarders, walking pedstrians and disabled people.						
Compatability with Land Use, Design Standards, and Planned Growth	Yes						
San Francisco Transportation Plan Alignment (SFTP)	Equity, Environmental Sustainability, Economic Vitality, Safety and Livability						
Angiment (SFTF)	Equity - The Street Resurfacing Program considers geographic equity when programming projects to ensure smoother streets in all areas of the City.						
	Environmental Sustainability - The Street Resurfacing Program strives to resurface the right road at the right time with the right treatment for the right price. Resurfacing candidates in this project during the proposed project timeline will minimize disruption to the public and ensure the roadway network is resilient.						
	Economic Vitality - Resurfacing the streets in the project will provide smoother streets for people to more easily access destination by all modes of transportation.						
	Safety and Livability - Resurfacing the streets in the project provides a smoother street for all modes of transportation, including buses, private vehicles, bicyclists, skateboarders, walking pedestrians, and disabled people.						

The next section includes criteria that are specific to each Expenditure Plan program. The questions that are required to be filled out for each program will auto-populate once the Prop L program is selected on the Scope & Schedule tab.

Street Resurfacing Program -- Prop L Project Candidate

Legend

Joint SFMTA Lead-Geary Boulevard Improvements Project Phase 2

Information as of May 2023

NOTES:

All Public Works Street Resurfacing Program candidates are subject to substitution and schedule changes pending available funding, visual confirmation, utility clearances and coordination with other agencies and are NOT guaranteed to be moved forward to construction. Unforeseen challenges such as increased work scope, changing priorities, cost increases or declining revenue may arise causing the Public Works Street Resurfacing Program candidates to be postponed or dropped from consideration.

Notes

The General Funds are subject to approval in the CCSF annual budget, expected July 2023.

Please fill o	Prop L Supplemental Information ut each question listed below (rows 2-8) for all projects.
Project Name	Street Repair and Cleaning Equipment
Relative Level of Need or Urgency (time sensitive)	Proposed equipment are replacements for units that are either (1) not CARB-compliant, or (2) at or beyond their useful life.
Prior Community Engagement/Level and Diversity of Community Support (may attach Word document):	Not directly applicable, but there is general consensus that updates and replacements for SFPW's fleet are urgently needed.
Benefits to Disadvantaged Populations and Equity Priority Communities	Equity Priority Communities often bear a higher degree of pollution burden. Use of CARB-compliant equipment and newer, upgraded equipment will reduce pollution burden while traversing regular service routes.
Compatability with Land Use, Design Standards, and Planned Growth	Yes
San Francisco Transportation Plan Alignment (SFTP)	Equity, Environmental Sustainability, Economic Vitality, Safety and Livability Environmental Sustainability - CARB-compliant equipment and newer, upgraded equipment will reduce pollution burden while traversing regular service routes. Up-to-date and properly scaled equipment ensures efficient operations.
	Economic Vitality/Safety and Livability - Ensuring cleanliness of streets, and providing sufficient heavy equipment to implement resurfacing projects to maintain the condition of the City's road network.
	iteria that are specific to each Expenditure Plan program. The questions ed out for each program will auto-populate once the Prop L program is selected on the Scope & Schedule tab.
15- St	reet Resurfacing, Rehabilitation, and Maintenance
Safety (Replacement of Street Repair and Cleaning Equipment - Sub-program)	Proposed equipment are replacements for units that are either (1) not CARB-compliant, or (2) at or beyond their useful life. Because of the age of the equipment, modern safety features are often non-existent or inadequate, jeopardizing the safety of the operating crew or driver. In addition, exposure to pollutants is disproportionately higher fgor employees, as they spend most working hours in close proximity to the outdated equipment.
Need (Replacement of Street Repair and Cleaning Equipment - Sub-program)	Proposed equipment are replacements for units that are at or beyond their useful life. Most have cumulative maintenance costs that exceed the cost of replacement, and are no longer efficient in supporting department operations. Clean fuel alternatives - if available and adequate for the scope of work - are considered and prioritized.

Project Name	Street Repair and Cleaning Equipment
Relative Level of Need or Urgency (time sensitive)	Proposed equipment are replacements for units that are either (1) not CARB-compliant, or (2) at or beyond their useful life.
Prior Community Engagement/Level and Diversity of Community Support (may attach Word document):	Not directly applicable, but there is general consensus that updates and replacements for SFPW's fleet are urgently needed.
Benefits to Disadvantaged Populations and Equity Priority Communities	Equity Priority Communities often bear a higher degree of pollution burden. Use of CARB-compliant equipment and newer, upgraded equipment will reduce pollution burden while traversing regular service routes.
Compatability with Land Use, Design Standards, and Planned Growth	Yes
San Francisco Transportation Plan Alignment (SFTP)	Equity, Environmental Sustainability, Economic Vitality, Safety and Livability Environmental Sustainability - CARB-compliant equipment and newer, upgraded equipment will reduce pollution burden while traversing regular service routes. Up-to-date and properly scaled equipment ensures efficient operations. Economic Vitality/Safety and Livability - Ensuring cleanliness of streets, and providing sufficient heavy equipment to implement resurfacing projects to maintain the condition of the City's road network.
	iteria that are specific to each Expenditure Plan program. The questions ed out for each program will auto-populate once the Prop L program is selected on the Scope & Schedule tab.
15- St	eet Resurfacing, Rehabilitation, and Maintenance
Safety (Replacement of Street Repair and Cleaning Equipment - Sub-program)	Proposed equipment are replacements for units that are either (1) not CARB-compliant, or (2) at or beyond their useful life. Because of the age of the equipment, modern safety features are often non-existent or inadequate, jeopardizing the safety of the operating crew or driver. In addition, exposure to pollutants is disproportionately higher fgor employees, as they spend most working hours in close proximity to the outdated equipment.
Need (Replacement of Street Repair and Cleaning Equipment - Sub-program)	Proposed equipment are replacements for units that are at or beyond their useful life. Most have cumulative maintenance costs that exceed the cost of replacement, and are no longer efficient in supporting department operations. Clean fuel alternatives - if available and adequate for the scope of work - are considered and prioritized.

Attachment 1: SFPW Street Repair and Cleaning Equipment Backlog (as of 6/9/2023)

Purpose	Equipment Title	Total Units
Street Cleaning	Sweeper	5
Street Cleaning	Front End Loader	1
Street Cleaning	Flusher	1
Street Cleaning	Pickup Trucks (Full Size)	5
Street Cleaning	1-Ton Pick Up Truck	9
Street Cleaning	Flat Rack	3
Street Repair	10-Wheel Dump Truck	1
Street Repair	Asphalt Grinder	1
Street Repair	Crack Filling Machine	1
Street Repair	Excavator	1
Street Repair	Loader	1
Street Repair	Trailer	1
Street Repair	Asphalt Utility Truck	1
Street Repair	3/4-Ton Pickup	2
Street Repair	Mini Pickup	2
Street Repair	Bulldozer	1
