

**San Francisco
County Transportation
Authority**

BD031224

RESOLUTION NO. 24-36

RESOLUTION ALLOCATING \$1,440,000 AND APPROPRIATING \$108,000 IN PROP L SALES TAX FUNDS, WITH CONDITIONS, FOR FOUR REQUESTS

WHEREAS, The Transportation Authority received four requests for a total of \$1,548,000 in Prop L transportation sales tax funds as summarized in Attachments 1 and 2 and detailed in the attached allocation request forms; and

WHEREAS, The requests seek funds from the following Prop L Expenditure Plan programs: Muni Reliability and Efficiency Improvements, Safer and Complete Streets, and Transportation Demand Management; and

WHEREAS, As required by the voter-approved Expenditure Plans, the Transportation Authority Board has adopted a 5-Year Prioritization Program (5YPP) for each of the aforementioned Prop L programs; and

WHEREAS, All of the requests are consistent with the relevant 5YPP; and

WHEREAS, After reviewing the requests, Transportation Authority staff recommended allocating \$1,440,000 and appropriating \$108,000 in Prop L funds, with conditions, for four requests, as described in Attachment 3 and detailed in the attached allocation request forms, which include staff recommendations for Prop L allocations amounts, required deliverables, timely use of funds requirements, special conditions, and Fiscal Year Cash Flow Distribution Schedule; and

WHEREAS, There are sufficient funds in the Capital Expenditures line item of the Transportation Authority's approved Fiscal Year 2023/24 budget to cover the proposed actions; and

WHEREAS, At its February 28, 2024 meeting, the Community Advisory Committee was briefed on the subject requests and unanimously adopted a motion of support for the staff recommendation; now, therefore, be it

RESOLVED, That the Transportation Authority hereby allocates \$1,440,000 and appropriates \$108,000 in Prop L funds, with conditions for four requests as summarized in Attachment 3 and detailed in the attached allocation request forms; and be it further

RESOLVED, That the Transportation Authority finds the allocation of these funds to be in conformance with the priorities, policies, funding levels, and prioritization

**San Francisco
County Transportation
Authority**

RESOLUTION NO. 24-36

methodologies established in the Prop L Expenditure Plans, the Prop L Strategic Plan Baseline, as amended, and the relevant 5YPPs; and be it further

RESOLVED, That the Transportation Authority hereby authorizes the actual expenditure (cash reimbursement) of funds for these activities to take place subject to the Fiscal Year Cash Flow Distribution Schedules detailed in the attached allocation request forms; and be it further

RESOLVED, That the Capital Expenditures line item for subsequent fiscal year (FY) annual budgets shall reflect the maximum reimbursement schedule amounts adopted and the Transportation Authority does not guarantee reimbursement levels higher than those adopted; and be it further

RESOLVED, That as a condition of this authorization for expenditure, the Executive Director shall impose such terms and conditions as are necessary for the project sponsors to comply with applicable law and adopted Transportation Authority policies and execute Standard Grant Agreements to that effect; and be it further

RESOLVED, That as a condition of this authorization for expenditure, the project sponsors shall provide the Transportation Authority with any other information it may request regarding the use of the funds hereby authorized; and be it further

RESOLVED, That the Capital Improvement Program of the Congestion Management Program and the relevant 5YPPs are hereby amended, as appropriate.

R24-36 Attachment 1: Summary of Requests Received

Source	EP Line No./ Category ¹	Project Sponsor ²	Project Name	Current Prop L Request	Total Cost for Requested Phase(s)	Leveraging		Phase(s) Requested	District(s)
						Expected Leveraging by EP Line ³	Actual Leveraging by Project Phase(s) ⁴		
Prop L	1	SFMTA	Mission Street SoMa Transit Improvements	\$ 1,200,000	\$ 1,200,000	90%	0% <input type="text" value="5"/>	Design Engineering	6
Prop L	18	SFMTA	Vision Zero Left Turn Traffic Calming	\$ 100,000	\$ 100,000	83%	0%	Construction	3, 4, 5, 6, 8, 9, TBD
Prop L	18	SFMTA	Vision Zero Speed Limit Reduction	\$ 100,000	\$ 100,000	83%	0%	Construction	2, 3
Prop L	24	SFCTA / SFMTA	TDM Strategic Plan Update	\$ 148,000	\$ 148,000	87%	0%	Planning	Citywide
TOTAL				\$ 1,548,000	\$ 1,548,000				

Footnotes

¹ "EP Line No./Category" is the Prop L Expenditure Plan line number referenced in the Prop L Strategic Plan Baseline including: Muni Reliability and Efficiency Improvements, Safer and Complete Streets, and Transportation Demand Management.

² Acronyms: SFCTA (San Francisco County Transportation Authority), SFMTA (San Francisco Municipal Transportation Agency)

³ "Expected Leveraging By EP Line" is calculated by dividing the total non-Prop L funds expected to be available for a given Prop L Expenditure Plan line item (e.g. Pedestrian and Bicycle Facilities Maintenance) by the total expected funding for that Prop L Expenditure Plan line item over the 30-year Expenditure Plan period. For example, expected leveraging of 90% indicates that on average non-Prop L funds should cover 90% of the total costs for all projects in that category, and Prop L should cover only 10%.

⁴ "Actual Leveraging by Project Phase" is calculated by dividing the total non-Prop L, non-Prop K, non-Prop AA, or non-TNC Tax funds in the funding plan by the total cost for the requested phase or phases. If the percentage in the "Actual Leveraging" column is lower than in the "Expected Leveraging" column, the request (indicated by yellow highlighting) is leveraging fewer non-Prop L dollars than assumed in the Expenditure Plan. A project that is well leveraged overall may have lower-than-expected leveraging for an individual or partial phase.

⁵ Mission Street SoMa Transit Improvements is expected to reach 83% leveraging of Prop L when all project phases through construction are included.

R24-36 Attachment 2: Brief Project Descriptions ¹

EP Line No./ Category	Project Sponsor	Project Name	Prop L Funds Requested	Project Description
1	SFMTA	Mission Street SoMa Transit Improvements	\$ 1,200,000	<p>This request is for the design phase that will implement permanent full-time transit lanes, as well as transit priority and safety improvements along Mission Street between Beale Street and South Van Ness Avenue in the South of Market area. Improvements include longer bus zones, colorization of transit lanes, a transit bulb, left turn restrictions and increased crosswalk visibility. These changes will reduce delay on Muni Routes 14 and 14R and on Golden Gate Transit and SamTrans routes that operate on Mission. The Mission Street SoMa Transit Improvements project will be constructed through two San Francisco Public Works projects, estimated to start construction in 2026. The SFMTA anticipates that the transit project will be open for use by December 2027.</p>
18	SFMTA	Vision Zero Left Turn Traffic Calming	\$ 100,000	<p>This program will implement left-turn traffic calming (e.g., paint, post, rubber speed bumps) at 35 high priority locations on the High Injury Network by 2024. SFMTA has completed work at 8 locations and is requesting Prop L funds to install left turn traffic calming at 27 locations. Prop L would also fund outreach near installation sites and evaluation of effectiveness of the project on reducing average and high left turn speeds.</p> <p>Left turn crashes are one of the top severe and fatal crash factors for people walking and biking. This project will improve visibility and reduce conflicts for vulnerable road users. The SFMTA expects that the project will be open for use by December 2024 and evaluation will be done June 2025. See the attached Allocation Request Form for the list of locations included in this request.</p>
18	SFMTA	Vision Zero Speed Limit Reduction	\$ 100,000	<p>SFMTA is implementing new state legislative authority (AB 43) to reduce speed limits along eligible business activity corridors by implementing new 20 MPH corridors with new signage paired with education efforts. SFMTA has implemented slower speeds along 62 corridors to date. This Prop L request will fund installation of signage on 23 additional business activity corridors, a multi-lingual outreach and education campaign with high visibility campaign strategies such as light pole banners, transit shelter ads, and merchant posters, and program evaluation. See the attached Allocation Request Form for the list of locations included in this request. The SFMTA expects to have the project open for use by June 2024 and evaluation done by December 2024.</p>
24	SFCTA / SFMTA	TDM Strategic Plan Update	\$ 148,000	<p>TDM is a strategic set of projects, programs, and policies to increase travel choices and shift when and how people travel to maximize the efficiency and effectiveness of the transportation system, including encouraging sustainable modes of travel. This project will update the 2017-2020 San Francisco TDM Plan. Using post-pandemic travel data and best practices, the update will identify TDM priorities and guide projects to be funded with Prop L and other funding sources. The plan will be co-lead by SFCTA and SFMTA with input from a working group with local and regional stakeholders, including BART, Caltrain, and MTC. Staff expect to present the updated plan to the Board for adoption in June 2025. The request includes \$108,000 for SFCTA and \$40,000 for SFMTA.</p>
TOTAL			\$1,548,000

REQUEST

Brief Project Description

The Mission SoMa Transit Improvements project will implement permanent full-time transit lanes, as well as transit-priority and safety improvements along Mission Street between Beale Street and South Van Ness Avenue in the South of Market area. Improvements include longer bus zones, colorization of transit lanes, a transit bulb, left turn restrictions and increased crosswalk visibility. These changes will reduce delay on Muni Routes 14 and 14R and on Golden Gate Transit and SamTrans routes that operate on Mission.

SCHEDULE DETAILS

The capital elements of the Mission SoMa Transit Improvements Project will be done in coordination with two Public Works (SFPW) projects, estimated to start construction in 2026. As part of these two projects, Mission Street between 11th St and The Embarcadero will be repaved. MTA has been coordinating with SFPW so that MTA scope is part of the SFPW contracts. The SFPW projects include various sidewalk widenings (transit bulbs and pedestrian bulbs), traffic signal and transit signal priority upgrades, and repaving and striping along Mission St. SFMTA scope is being implemented through two contracts due to the overlap with the project limits for the South Downtown Design and Activation (Soda) project, which begins at Annie St (east of 3rd St). The projects are currently waiting to start the detailed design phase for capital improvements and are anticipated to start later in 2024, pending SFPW staffing availability. The contracts would be planned for advertisement in 2026 and SFMTA scope would be incorporated into the contracts, so would be fully designed by the time of advertisement.

The Mission SoMa project has an Affordable Housing and Sustainable Communities (AHSC) grant. Per the AHSC guidelines, the project must be complete by 2029.

Attachment 1. Mission Street SoMa Transit Improvements Detailed Scope

Following is the project scope as presented to the SFMTA Board of Directors on June 15, 2021. Ridership data was updated as of November 2023. No changes have been made to the scope as of February 2024.

DESCRIPTION

The project would create permanent full-time transit lanes on Mission Street between 1st and 11th Streets for two of Muni’s busiest routes, the 14 Mission and 14R Mission Rapid, as well as regional express buses. The project would also make minor changes between Beale Street and 1st Street and between 11th Street and South Van Ness Avenue. These changes are described under “Current Proposal.” Temporary full-time transit lanes were implemented on Mission during the COVID-19 pandemic. Prior to COVID, this segment of Mission had part-time transit lanes. The project would also widen the existing narrow transit and travel lanes to reduce the risk of "sideswipe" collisions and allow more efficient transit and traffic operations, making permanent the current temporary removal of curbside parking and loading from one side of the street. It would also increase capacity for transit by lengthening bus zones to accommodate a minimum of two 60-foot buses, or three 60-foot buses at stops likely to be used by Rapid service.

The project would leave in place temporary changes to lane striping and curb use designations made last fall as part of the Temporary Emergency Transit Lanes (TETL) program, with some modifications.

We anticipate returning to the Board with relatively minor additional changes focused on developer-funded sidewalk widening between Steuart and Annie streets, which would require additional removal of parking and loading. We are currently coordinating with the Planning Department and Public Works on this effort, which is part of the larger interagency South Downtown Design + Activation (SODA) project.

Transit

Figure 1 Project Segment

Prior to the COVID-19 pandemic and resulting changes to Muni service, Mission South of Market was served by Muni routes 14 Mission, 14R Mission Rapid, 14X Mission Express, and 714 BART Early Bird, as well as Golden Gate Transit Routes 30, 70, 101, and 101X, and SamTrans Routes 292, 397, 398 and FCX. Routes 14X and 101X are not currently operating due to COVID resource constraints.

Routes 14 Mission and 14R Mission Rapid have historically been among Muni's busiest, with average weekday boardings in Fiscal Year (FY) 2020 of 26,700 and 20,300, respectively. Their

combined daily ridership at that time of 47,000 was nearly equivalent to that of the N Judah (46,900), and only moderately less than that of Muni's 38 Geary and 38R Geary Rapid combined (54,300).

As the eastern part of the project area is within San Francisco's office and retail core, and the Salesforce Transit Center regional bus hub is at the eastern end of the segment at Mission and 1st Street, bus loads have historically remained high throughout the segment. Pre-pandemic, several stops were used by more than 1,000 passengers per day, with some stops approaching 3,000 combined boardings and alightings.

Even during the COVID-19 pandemic, Mission Street has remained a busy transit corridor and is expected to continue to grow as the City rebuilds. In November 2023, Routes 14 Mission and 14R Mission Rapid averaged 42,800 boardings per day, or 91% of their pre-pandemic total, while systemwide weekday ridership was 64% of the pre-pandemic (FY2020) total.

Additionally, construction of the SFMTA's Better Market Street (BMS) project will temporarily displace some Muni service to Mission Street, which is the closest parallel street to Market Street. While traffic routing plans are still being finalized, it is likely that Muni's 9 San Bruno and 9R San Bruno Rapid, which cross Mission to reach Market, will be relocated to Mission for the duration of BMS phase one construction, scheduled to begin this fall and last several years. Other routes may also be relocated at times.

Traffic, Parking and Loading

Prior to fall 2020, when temporary changes were made between 3rd Street and 11th Street, Mission was a four-lane street -- two lanes each way -- with parallel parking and loading on both sides at most points. However, the travel lanes were very narrow: the inner lanes were nine feet wide, and the outer lanes were 9 feet, 3 inches. Since buses are 10 feet, 6 inches wide including side mirrors, operators would often straddle both lanes.

At different times of day (varying by block and direction), one or both of the outer lanes would be designated transit-only. When this was the case, parking and loading would generally be prohibited on that side of the street to provide additional space. The resulting lanes were approximately 17 feet, 3 inches wide, wider than needed for safe and efficient transit operations, but still not quite wide enough for buses to pass illegally parked vehicles without merging into the adjacent lane. Additionally, this arrangement had the effect of providing more capacity for traffic (and more opportunities for speeding, increasing the risk to pedestrians in a Vision Zero High Injury Network corridor) at off-peak times, rather than during peak traffic periods.

Despite strong off-peak demand on Muni's 14 Mission and 14R Mission Rapid, transit-only restrictions were in effect only during the day on weekdays (7 a.m. to 6 p.m.) in the eastern part of the segment, and during one or both weekday peak periods (7 to 9 a.m. and 4 to 6 p.m. eastbound, and 4 to 6 p.m. westbound) in the western part. Between 1st and 3rd streets, all parking and loading was prohibited from 7 to 9 a.m. and 3 to 6 p.m. weekdays, and between 5th and 11th streets, all parking and loading was prohibited from 7 to 9 a.m. and 4 to 6 p.m. eastbound, and from 4 to 6 p.m. westbound (parking was also prohibited westbound between 4th and 5th streets from 3 to 6 p.m.).

In short, the previous travel lanes were too narrow for safe and efficient bus operations most of the time, and much of the parking and loading on the street was prohibited the rest of the time.

Temporary Emergency Transit Lanes Changes

In 2014, the SFMTA Transit Effectiveness Project (TEP) recommended transit improvements to Mission Street between Spear Street and South Van Ness Avenue (improvements that served as the basis for the updated proposal described here). Transit improvements have since been made to other segments of Mission Street, including in the Mission District in 2016. Active planning for improvements to this segment of Mission Street began in late 2019. The COVID-19 pandemic began in early 2020.

Because the Mission Street SoMa Transit Improvements Project was already well underway when the pandemic began, and because the 14 Mission and 14R Mission Rapid are Muni Service Equity Strategy routes with high percentages of riders of color and riders from low-income households, the project was well-positioned for partial implementation as part of the SFMTA's TETL Program.

The TETL Program, approved by the SFMTA Board of Directors in June 2020, is part of the Agency's response to the pandemic. It allows for temporary implementation of transit-only lanes in corridors where they can help ensure that essential trips made on transit remain reliable and relatively safe as the economy recovers and traffic begins to return. Under the TETL Program, temporary transit lanes will have to be removed within 120 days of the end of the City's emergency shelter-in place order (the "Stay Safer at Home Health Order") unless they are separately approved by the SFMTA Board.

The Board's approval of the TETL Program included approval of temporary full-time transit-only lanes along Mission Street between 1st and 11th Streets. The TETL changes were made between 3rd and 11th streets in late August and September 2020 (proposed changes between 1st and 3rd streets were delayed and have not been implemented). These changes primarily consisted of restriping the roadway to remove parking and loading on one side of the street and widen travel lanes, along with making the transit-only lanes full-time. Some remaining curb uses were also redesignated, mostly to support the commercial loading needs of nearby businesses.

Figure 2: Cross-sections: Previous (above) and Current/Proposed (below)

As previously noted, prior to the TETL changes, this segment of Mission consisted of two travel lanes each way, plus curbside parking and loading on both sides of the street. However, one lane in each direction was converted to transit-only part of the time, and at those times, parking and loading was generally prohibited on that side of the street. At off-peak times, the roadway provided more capacity for traffic (and more opportunities for speeding) despite lower traffic volumes.

Removing parking and loading on one side of the street allowed all four travel lanes to be widened to standard dimensions (see Figure 2 above). While converting the existing part-time transit-only lanes into full-time transit-only lanes reduced the number of traffic lanes off-peak, it did not affect peak traffic capacity.

As part of the TETL changes, a total of approximately 130 parking and loading spaces were removed between 5th and 11th streets, a distance of approximately 0.8 miles (no changes were made to parking and loading between 3rd and 5th streets). However, widening the transit lanes allowed toway restrictions on remaining parking and loading spaces to be rescinded.

Additionally, care was taken to ensure that the commercial and passenger loading needs of adjacent properties could be met to the extent possible given the removal of parking and loading spaces necessary as part of the concept. In practice, this meant two things:

1. The side of the street from which parking and loading was removed varied from block to block, and in some cases, from one end of the block to the other. These design decisions were made primarily on the basis of analysis of where removal might have the least overall impact on loading.
2. Many remaining parking spaces were converted to commercial or passenger loading spaces, both on Mission Street as well as on cross streets.

TETL Evaluation

Following implementation of the TETL project, a series of surveys were conducted of perceptions of the project among different stakeholder groups:

- A survey of business owners in the corridor, focused on loading impacts;
- A survey of the general public, including both Muni riders and non-riders, with questions related to project benefits and impacts; and
- A survey of Muni's 14 Mission and 14R Mission Rapid operators, with questions about transit operations.

Technical evaluation was also conducted of project performance and the results are described below. This evaluation, along with evaluations of other TETL projects, will be described in fact sheets and a report to be released this summer.

A number of refinements were ultimately made to the current proposal based on the surveys and evaluation; these are described in the following section, "Current Proposal."

Key findings from the surveys and evaluation include:

- **During the mid-day, when transit lanes were added, transit travel times have improved significantly over pre-COVID conditions, and they have remained relatively steady since last summer even as traffic has increased.** Between January and March of this year, average round-trip travel time between 5th and 11th streets between 9 a.m. and 4 p.m. was 20% lower on Route 14 and 18% lower on Route 14R than in January and February of 2020, prior to the pandemic. In January through March of this year, average travel time was 3% higher on the 14 and 1% higher on the 14R than between June and August of last year, during the pandemic and prior to implementation of the project. However, over that same period, traffic volumes on Mission between 3rd and 9th increased by approximately 20%. (Note that the segments do not match due to differences between data sources). This is an indication that adding transit lanes in the mid-day has protected transit against increasing traffic congestion.

- **Even though a large number of parking spaces were removed, availability of commercial loading spaces increased substantially.** Redesignating parking spaces as commercial loading spaces (which revert to general parking outside of designated hours) and rescinding towaway restrictions served to increase the total hours of availability of yellow zones by a substantial amount, nearly 40%. (While similar measures were used to limit the impact on passenger loading zones; their hours of availability decreased by about 20%.)
- **The general public survey found support for making the temporary changes permanent.** 65% of respondents said they would “definitely” or “probably” support making the TETL changes permanent, compared to just 24% who said they would “definitely” or “probably” oppose that. The remainder neither supported nor opposed extension or weren’t sure.

Other notable findings included:

- Citations issued for **double-parking**, parking in the transit lane or in a bus zone on Mission between 3rd and 11th streets increased substantially to 40 in October, the first full month after implementation. This was up from 14 in September and 18 in August. Given the reduction in curbside parking in the corridor, double-parking is expected to be an ongoing challenge. The operator survey found a great deal of frustration among operators about double-parking in the transit lane. A pilot program is now in development to post additional signage.
- As with travel times, **travel time variability** (as measured by differences between 90th and 50th-percentile travel times) was much lower in January through March of this year than it was in January and February of last year, prior to COVID: 9% on the 14 and 20% on the 14R. Variability in January through March was modestly higher than in June through August of last year; however, traffic increased substantially over that same period. Overall headway adherence on both routes has remained relatively constant since last summer (generally in the 80 to 85% range).
- Numbers of **collisions** involving transit vehicles in the corridor declined with the onset of the pandemic and have remained relatively low, ranging from 0 to 3 per month (as compared to 7 in the last full month before the pandemic, February 2020). It is anticipated that the project design will continue to support reduced collisions from pre-pandemic levels. The Inner Mission Muni Forward project in the Mission District, which similarly widened narrow lanes, reduced the number of sideswipes by 50%.
- The total number of **vehicular collisions** between 5th and 11th streets decreased from 53 in 2019 to 22 in 2020, a 58% decline. The number of collisions involving pedestrians decreased from 15 to 9, or by 40%.
- In the **general public survey**, when asked, “Thinking about the overall quality of your Muni trip since early October,” 42% of respondents answered the 14 Mission or 14 Mission Rapid was “better,” 21% answered “about the same,” and 23% answered “worse.” When asked about driving, parking and pick-up/drop-off conditions, a plurality of respondents to each question said conditions had gotten worse (for example, 46% said parking had gotten “more

difficult”).

- A total of 28 business owners and nonprofit directors responded to the **loading survey**. When asked, “Has your business or property been impacted by the recent curb use and loading zone changes on Mission Street,” 19 answered yes, or 68%.

Current Proposal

Based on the TETL project evaluation described in the previous section, a number of changes were made to the current proposal, most notably to curb use designations. The previous, temporary (legislated, but not implemented east of 3rd Street) and proposed configurations of parking and loading on Mission between 1st and 11th streets are shown in Figures 3-7 on the following pages.

Mission SoMa Transit Improvements – Diagram of Curb Uses

Mission SoMa Transit Improvements – Diagram of Curb Uses

Mission SoMa Transit Improvements – Diagram of Curb Uses

Mission SoMa Transit Improvements – Diagram of Curb Uses

Mission SoMa Transit Improvements – Diagram of Curb Uses

Figures 3-7: Previous, Temporary and Proposed Curb Uses

Previous, temporary, and proposed numbers of parking, commercial loading, and passenger loading spaces on each block face are shown in Figure 8 (note that the temporary changes between 1st and 3rd streets were not implemented). In reading the table, please note the following:

- Four parking spaces on cross streets were converted to commercial or passenger loading zones as part of the TETL project: three parking spaces on the west side of 9th Street just south of Mission were converted to passenger loading, and one parking space on the east side of 11th Street just south of Mission was converted to commercial loading. As part of this proposal, three more parking spaces on cross streets would be converted to commercial loading zones: one parking space on the east side of 9th Street just north of Mission and two more parking spaces on the east side of 11th Street just south of Mission.
- Loading spaces generally become available for general parking outside of designated loading hours.
- Almost all spaces previously available were unavailable much of the day on weekdays due to the towaway restrictions previously described.

TOTAL			218	65	59	65	61	41	50	62	48
NET CHANGE			--	--	--	-153	-4	-18	-168	-3	-11

Figure 8: Previous, Temporary and Proposed Numbers of Parking and Loading Spaces

As Figure 8 indicates, a total of 168 parking, 3 commercial loading and 11 passenger loading spaces, or 182 total spaces, are proposed to be removed on Mission between 1st and 11th streets, a distance of approximately 1.5 miles. This amounts to 77% of parking spaces, 5% of commercial loading spaces, and 19% of passenger loading spaces.

In addition to the parking and loading changes shown in Figures 3 and 4, other major refinements or additions to the TETL project in the current proposal include:

- Lengthening of existing bus zones to accommodate a minimum of two 60-foot buses, or three 60-foot buses at stops likely to be used by Rapid service.
- Colorization of transit lanes to improve compliance.

¹ There are also three motorcycle parking spaces on this block face.

- Relocation of the inbound transit lane from the outer lane to the inner lane between Beale and 2nd streets, allowing buses to remain to the left of vehicles turning right at 1st Street (pre-pandemic, PM peak queues at this location were very long due to its location on a primary route to the Bay Bridge), and removing autos from the lane serving the boarding island in front of the Salesforce Transit Center.
- In tandem with the above, removal of towaway requirements for parking and loading spaces between Beale and Fremont (note that the transit lanes east of 1st Street are already in effect full-time).
- Standardization of parking meter hours to 7 a.m. to 6 p.m., Monday through Saturday.
- Construction of a transit bulb outbound on the far side of the intersection at 4th Street, a heavily-used stop in an area with high pedestrian volumes, and a major transfer point providing connections to Muni routes 8 Bayshore, 30 Stockton and 45 Union/Stockton, as well as future Central Subway service.
- Relocation of the inbound stop at 11th Street from the near side to the far side of the intersection, allowing the inbound 9 San Bruno and 9R San Bruno Rapid to stop at 11th Street after turning right onto Mission Street.
- Restriction of left turns westbound at Washburn Street, just west of 9th Street, to reduce conflicts in the inbound transit lane and improve safety.
- Conversion of the outer lane eastbound at 11th Street, where the eastbound transit lane begins and the street narrows from two traffic lanes to one, to a right turn-only lane for traffic.
- Pedestrian safety improvements to crosswalk visibility (note that the primary pedestrian safety benefit from this project comes from reducing the number of traffic lanes from four to two during off-peak periods).

REQUEST

Brief Project Description

This program will implement left-turn traffic calming (e.g., paint, post, rubber speed bumps) at 35 high priority locations on the High Injury Network by 2024. SFMTA has completed work at 8 locations and requests Prop L funds to install left-turn traffic calming at 27 locations. Prop L would fund outreach near installation sites and evaluation of effectiveness of the project on average and high left turn speeds. Left turn crashes are one of the top severe and fatal crash factors for people walking and biking. This project will improve visibility and reduce conflicts for vulnerable road users.

Detailed Scope, Project Benefits and Community Outreach

This program will implement left-turn traffic calming (e.g., paint, post, rubber speed bumps) at 35 high priority locations on the High Injury Network by 2024. Under this program the SFMTA has completed work at 8 locations, work orders are pending to install 13 locations, and a remaining 14 locations need to be identified. The SFMTA requests Prop L funds to implement traffic calming measures at the 13 approved locations and the 14 remaining TBD locations. Prop L would also fund outreach and evaluation.

Left turn crashes are one of the top severe and fatal traffic crash factors for people walking and biking. That's why the SFMTA piloted new left turn calming treatments in 2020. Pilot results showed a 17% decrease in average left turn speeds and a 71% decrease in high left turn speeds. The pilot also included a multilingual citywide education campaign funded through an Active Transportation Program which resulted in 17,000 in-person interactions, 76 million digital impressions through targeted media buys, funded six community based organizations, and potentially helped extend the slower driving behavior from the engineering treatments. Project website is available at www.visionzerosf.org/leftturns and the 2021 Intersections Project evaluation report from the 2021 pilot is available at www.sfmta.com/safe-streets-evaluation-program.

Due to the pilot's positive results, the SFMTA made the commitment in the 2021 Vision Zero Action Strategy to expand the left turn traffic calming program to 35 new locations by 2024. This project will improve visibility and reduce conflicts for vulnerable road users. The SFMTA is on schedule with this commitment.

This funding request is for staff labor and materials to install left turn traffic calming measures at the 13 approved locations and 14 future locations to fulfill this commitment. SFMTA is evaluating criteria for turn calming citywide as part of the Quick-Build Toolkit effort. The SFMTA will establish the criteria by March 2024 and apply to city streets in order to identify locations for the Left Turn Traffic Calming project. SFMTA anticipates to have locations identified by the spring and will provide the final lists. This project uses paint, post, and rubber speed bumps to calm left turns at identified high crash sites. After implementation, staff will complete multilingual outreach around installation sites to raise awareness and build support among nearby businesses, organizations, and members of the public. Upon completion of the initial 35 locations, staff will evaluate effectiveness of the left turn traffic calming treatments and analyze changes in average and high speeds, similar to other peer city left turn treatment evaluations.

For outreach during the pilot, SFMTA undertook a Neighborhood Education Campaign, focused on informing residents near the pilot locations about their purpose, digital display ads, and online videos. As well, partnering with community-based organizations, SFMTA undertook a city-wide outreach campaign that reached over 17,000 people, along with a multi-lingual advertising campaign utilizing bus ads, pole banners, and bus stop ads.

Project Location

High Injury Network and identified high crash sites for left turns.

SCHEDULE DETAILS

Community outreach - After implementation, staff will complete multilingual outreach around installation sites to raise awareness and build support among nearby businesses, organizations, and members of the public. Outreach will be conducted on a rolling basis as turn treatments are installed, likely grouped together geographically, and will occur between Apr - Dec 2024.

Project Coordination - Project staff will coordinate with other Vision Zero projects such as Quick-Builds (i.e. Lincoln Quick Build) and Quick-Build Toolkit.

Deliverables

1. Quarterly progress reports (QPRs) shall include % complete to date, photos of work being performed, improvements completed to date, upcoming project milestones (e.g. ground-breaking, ribbon-cutting), and delivery updates including work performed in the prior quarter, work anticipated to be performed in the upcoming quarter, and any issues that may impact delivery, in addition to all other requirements described in the Standard Grant Agreement.

2. With the first QPR (due April 2024) SFMTA shall provide 2-3 photos of typical before conditions; with the first quarterly report following initiation of fieldwork Sponsor shall provide a photo documenting compliance with the Prop L attribution requirements as described in the SGA; and on completion of the project Sponsor shall provide 2-3 photos of completed work.

3. With the first QPR (due April 2024) SFMTA shall confirm the final list of locations for the full scope of the 27 locations funded by this request.

4. Following project completion, SFMTA shall provide an evaluation report of the effectiveness of the project.

Notes

1. Reminder: All construction signage, project fact sheets, websites and other similar materials shall comply with the attribution requirements established in the Standard Grant Agreement.

REQUEST

Brief Project Description

SFMTA is implementing new state legislative authority (AB43) to reduce speed limits along business activity corridors by implementing new 20 MPH corridors along eligible corridors with new signage paired with education efforts. SFMTA has implemented slower speeds along 62 corridors to date. This Prop L request will fund the installation of signage on 15 additional business activity corridors, a multi-lingual outreach and education campaign with high visibility campaign strategies such as light pole banners, transit shelter ads, and merchant posters, and program evaluation.

Detailed Scope, Project Benefits and Community Outreach

The SFMTA is implementing new state legislative authority (AB43) to reduce speed limits along business activity corridors by implementing new 20 MPH corridors along eligible corridors with new signage and education efforts. One eligible criteria for a business activity corridor is if the streets have at least half of the property uses are commercial, such as dining or retail. Speeding is one of SF's top primary crash factors for traffic deaths. This project will reduce speeds on San Francisco streets and support Vision Zero efforts to end traffic deaths. Giving local jurisdictions authority to set speeds based on safety and not the 85 percentile is an important Vision Zero tool.

As of January 2024 the SFMTA has implemented slower speed limits along 62 corridors, which amounts to 44 miles of street improvements. 2023 work was funded through Prop K funds and included staff time for planning, design, construction, outreach, materials, evaluation, and consultant support for outreach and high visibility campaign components such as light pole banners, transit shelter ads, and merchant posters. As corridors are implemented, coordination notifications are sent to navigation companies (Waze, Google, etc), police department, and transit colleagues. Quarterly implementation updates are sent to the Board of Supervisors as well as to the project page map. For maps and more project detail visit: <https://www.sfmta.com/getting-around/walk/speed-management>.

In 2024 the SFMTA will continue implementing the remainder of the business activity corridors. This Prop L request is for installation, outreach, and evaluation for the following 15 corridors and timeframe below.

1. Green Street, between Grant Avenue and Powell Street (D3) – Feb 2024
2. Vallejo Street, between Grant Avenue and Powell Street (D3) – Feb 2024
3. Beach Street, between Taylor Street and Polk Street (District 2 and 3) – Mar 2024
4. Larkin Street, between North Point Street and Beach Street (District 2) – Mar 2024
5. Leavenworth Street, between Beach Street and Jefferson Street (D3) - Apr 2024
6. Jones Street, between Beach Street and Jefferson Street (D3) – Apr 2024
7. Mason Street, between Beach Street and Jefferson Street (D3) – May 2024
8. Powell Street, between Beach Street and Jefferson Street (D3) – May 2024
9. Taylor Street, between Bay Street and Jefferson Street (D3) – Jun 2024
10. Washington Street, between Kearny Street and Stockton Street (D3) – Jun 2024
11. Clay Street, between Montgomery Street and Stockton Street (District 3) – Jul 2024
12. Sacramento Street, between Kearny Street and Stockton Street (D3) - Jul 2024
13. Bush Street, between Montgomery Street and Grant Avenue (District 3) – Aug 2024
14. Sutter Street, between Market Street and Mason Street (D3) – Aug 2024
15. Kearny Street, between Market Street and Pine Street (D3) – Sep 2024

These 15 corridors complete the list of the initial analysis for business activity corridors. We are planning to do a second round of analysis for any business activity corridors missed and what would fall under the “safety corridors” portion of the AB43 legislation. The SFMTA expects to identify those remaining 7 corridors by summer 2024.

Future work not funded by this Prop L request: AB43 legislation will also expand to 'safety corridors' and the SFMTA hopes to expand this work along the High Injury Network after completing an analysis of eligible corridors. 'Safety corridor' shall be defined by the Department of Transportation in the next revision of the California Manual on Uniform Traffic Control Devices. In making this determination, the department shall consider highways that have the highest number of serious injuries and fatalities based on collision data that may be derived from, but not limited to, the Statewide Integrated Traffic Records System.(2)The Department of Transportation shall, in the next revision of the California Manual on Uniform Traffic Control Devices, determine what constitutes land or facilities that generate high concentrations of bicyclists and pedestrians, as used in paragraph (2) of subdivision (a). In making this determination, the department shall consider density, road use type, and bicycle and pedestrian infrastructure present on a section of highway.

Deliverables

1. Quarterly progress reports (QPRs) shall include % complete to date, photos of work being performed, improvements completed to date, upcoming project milestones (e.g. ground-breaking, ribbon-cutting), and delivery updates including work performed in the prior quarter, work anticipated to be performed in the upcoming quarter, and any issues that may impact delivery, in addition to all other requirements described in the Standard Grant Agreement.
2. With the first QPR (due July 2024) SFMTA shall provide 2-3 photos of typical before conditions; with the first quarterly report following initiation of fieldwork Sponsor shall provide a photo documenting compliance with the Prop L attribution requirements as described in the SGA; and on completion of the project Sponsor shall provide 2-3 photos of completed work.
3. With the first QPR (due July 2024) SFMTA shall confirm the final list of locations for the full scope of the 23 locations funded by this request.
4. Following project completion, SFMTA shall provide an evaluation report of the effectiveness of the project.

Notes

1. Reminder: All construction signage, project fact sheets, websites and other similar materials shall comply with the attribution requirements established in the Standard Grant Agreement.

Supervisory District	Citywide

REQUEST

Brief Project Description

TDM is a strategic set of projects, programs, and policies to increase travel choices and shift when and how people travel to maximize the efficiency and effectiveness of the transportation system, including encouraging sustainable modes of travel. This project will update the 2017-2020 San Francisco TDM Plan, including developing a new list of measures to change travel behavior. Using post-pandemic travel data and best practices, the update will define TDM priorities and guide projects to be funded with Prop L and other funding sources.

Detailed Scope, Project Benefits and Community Outreach

TDM is a strategic set projects, programs, and policies to increase travel choices and shift when and how people travel to maximize the investment priorities to improve efficiency and effectiveness of the transportation system defined in the San Francisco Transportation Plan 2050, including encouraging sustainable modes of travel. The 2017-2020 San Francisco TDM Plan was developed as a multi-agency effort and included strategies and actions to support mode shift, though the plan did not prioritize the list of measures for implementation and many measures have not been implemented.

The SFCTA and SFMTA are requesting Prop L funds for the TDM Strategic Plan Update, which will build on current travel data (including a MTC Bay Area Travel Diary Survey which Prop K sales tax is helping to fund) and factors, assess and refine the strategies recommended and implemented from the prior TDM Plan. The update will be informed by the TDM Market Analysis evaluation (underway) and will include reviewing San Francisco's existing TDM goals and revising the goals to align with goals and priorities established in the Climate Action Plan, San Francisco Transportation Plan, and other local and regional plans, as appropriate. The TDM Strategic Plan Update will determine the priority TDM projects and programs to be implemented with Prop L and other funding sources.

The SFCTA and SFMTA will use a co-lead approach for each task associated with the TDM Strategic Plan Update, which requires close coordination and collaboration. The SFCTA will be responsible for writing and finalizing all project deliverables. SFMTA will provide comments on an draft documents produced by the SFCTA. The SFCTA will revise and finalize the materials based on SFMTA

comments and the study team will present materials to the TDM Working Group, which includes city and regional TDM stakeholders (e.g., BART, MTC, Caltrain, San Mateo's Commute.org, etc.).

San Francisco County Transportation Authority (SFCTA) and San Francisco Municipal Transportation Agency (SFMTA) Co-Lead Coordination Approach

The SFCTA and SFMTA will use a co-lead approach for each task associated with the TDM Strategic Plan Update, which requires close coordination and collaboration. The SFCTA will be responsible for writing and finalizing all project deliverables. SFMTA will provide comments on draft documents produced by the SFCTA. The SFCTA will revise and finalize the materials based on SFMTA comments and the study team will present materials to the TDM Working Group, which includes city and regional TDM stakeholders (e.g., BART, MTC, Caltrain, San Mateo's Commute.org, etc.). Upon receiving comments, the SFCTA and SFMTA will align on how to address stakeholder feedback and the SFCTA will be responsible for the revisions of deliverables. The SFMTA will complete a final review before deliverables are finalized. Review periods will generally span two to three weeks.

Task 1: Project Management

The study team will hold a kick-off meeting to discuss project expectations including defined project staff roles and responsibilities, alignment to the TDM Market Analysis, and all other relevant project information. An agenda will be co-developed by SFMTA and SFCTA staff and circulated a week before the kick-off meeting. The study team will be staffed by personnel from the SFCTA and the SFMTA. The San Francisco Environment, the San Francisco Planning Department, BART, Caltrain, and the Metropolitan Transportation Commission (MTC) will be consulted at project milestones.

Deliverables:

- Project kickoff meeting agenda and notes

Task 2: 2017 TDM Strategic Plan Evaluation and Progress Assessment (April 2024-Aug 2024)

The study team will conduct a detailed review and refinement of the strategies recommended and implemented in the 2017-2020 San Francisco TDM Plan and those that have been implemented regionally. This review will include a summary of the recommendations already implemented or in-progress since the adoption of the last TDM Plan, and an evaluation of their effectiveness, where possible. The results of this assessment and the TDM Market Analysis will inform the program recommendations made in the TDM Strategic Plan Update. The study team will summarize their evaluation findings in a TDM Strategic Plan Progress Evaluation Memo.

Deliverables:

- Documentation of SFMTA feedback on Draft TDM Strategic Plan Evaluation Memo
- Draft and Final TDM Strategic Plan Progress Evaluation Memo

Task 3: Recommendations (Sept 2024-Jan 2025)

Building on the Market Analysis findings and on Task 2 findings, the study team will develop criteria for prioritizing TDM efforts, and apply these criteria to define recommendations for priority TDM program implementation. These recommendations may include adjustments to currently implemented / existing TDM programs in response to review findings identified in Task 2. These recommendations will be summarized in a TDM Strategic Plan Update Recommendations Memo. Because the TDM Market Analysis is focused on San Francisco residential trip making, the Strategic Plan recommendations will also include regional TDM efforts and Business TDM recommendations, based on the SFMTA Business TDM Study, expected to be finalized in early 2025.

Deliverables:

- Prioritization criteria
- Documentation of SFMTA feedback on TDM Strategic Plan Update Recommendations Memo
- Draft and Final TDM Strategic Plan Update Recommendations Memo

Task 4: Agency Inreach and Coordination (Quarterly, April 2024-June 2025)

The study team will solicit feedback from the TDM Working group, which includes representatives of city agencies including SFMTA, SF Planning, SF Environment and regional agencies including BART, Caltrain, and MTC, throughout the Strategic Plan update process including at key Task milestones and on the draft recommendations. The study team will use partner agency feedback to develop a final plan (Task 5).

Deliverables:

- Partner agency feedback on Task 3 draft recommendations

Task 5: Final Report (Feb 2025-June 2025)

The SFCTA will lead the development of the final plan, in coordination with the SFMTA, and summarize previous interim deliverables in a final report, including an executive summary. Following the circulation of the Draft Final Report by the SFCTA, the SFMTA will submit feedback. The SFCTA will consolidate feedback into a final report. The SFMTA will review the final report before it is submitted as a deliverable.

The study team will develop a presentation to be used for Board presentations. The SFCTA will lead the presentation of the report to the Transportation Authority Board for adoption.

Deliverables:

- Documentation of SFMTA feedback on Task 5 draft report
- Draft and Final Report
- Draft and Final Board Presentation Deck
