13. **COVID-Era Congestion Tracker - INFORMATION\***

The recent shelter-in-place orders have rapidly changed traffic patterns and congestion. Overnight, San Francisco went from experiencing some of the worst congestion in the country to being virtually congestion-free. Recently, as the economy begins to recover, we have seen traffic and congestion levels rising. The Transportation Authority's COVID-Era Congestion Tracker ([covid-congestion.sfcta.org](https://covid-congestion.sfcta.org)) is an interactive map of critical roadways in San Francisco that provides decision-makers with the ability to monitor weekly changes in roadway congestion in order to identify emerging congestion "hot spots" and identify appropriate management strategies. The congestion tracker also allows users to view speed data for the city overall or for particular segments, and to compare current speeds to pre-COVID conditions. We will continue to update the tracker, analyze the data, and use this as an input as we evaluate different scenarios for the re-opening of San Francisco. We will broad a short demonstration of the tracker at the June 23 Board meeting.
