Project Name:	14th Street Road Diet [NTIP Capital]
Grant Recipient:	San Francisco Municipal Transportation Agency

EXPENDITURE PLAN INFORMATION

PROP K Expenditure Plans	Traffic Calming
Current PROP K Request:	\$60,700
Supervisory District	District 08

REQUEST

Brief Project Description

Implementation of a "road diet" on 14th Street between Castro Street and Sanchez Street, in response to neighborhood concerns regarding traffic and pedestrian safety. Improvements will include elimination of an eastbound lane on 14th Street between Castro and Sanchez Streets, a left-turn-only lane, and red zones to daylight intersection. Benefits will include improved pedestrian visibility and safer turning movements. The proposal was developed in coordination with Supervisor Mandelman's office, the Duboce Triangle Neighborhood Association and other members of the local community.

Detailed Scope, Project Benefits and Community Outreach

Scope

The proposed project will eliminate one eastbound lane on 14th Street, between Castro Street and Sanchez Street, while converting one of the eastbound lanes approaching Castro Street to left turn only. Daylighting red zones will also be added or extended at intersections within the project limits. The current parallel parking on the north side of 14th Street will be changed to back-in angled parking, which will increase the availability of on-street parking by approximately six spaces. The centerline along 14th Street will be shifted south to accommodate angled parking on the north side and one lane in each direction. No new bus zones, bike lanes, bike boxes, raised pavement markers, concrete work, or other structural elements are planned. The lane removal will provide a wider lane for transit in the eastbound direction and is not expected to significantly affect travel times. The project is also expected to improve the pedestrian experience by reducing the number of lanes traversed when crossing 14th Street. See attached design drawings with current and proposed striping for details.

The Transportation Authority's Neighborhood Transportation Improvement Program (NTIP) is intended to strengthen project pipelines and advance the delivery of community supported neighborhood-scale projects, especially in Communities of Concern and other neighborhoods with high unmet needs. Commissioner Mandelman has expressed support for using the \$60,700 in District 8 NTIP funds included in this request.

Planned Outreach

The public will have opportunities to make comments to the SFMTA Board at two public hearings in

E6-2

Fall 2021. Flyers with information on joining the hearings will be posted along the project limits.

Previous Outreach

- August 11, 2021: SFMTA (Eddie Tsui) met virtually with Duboce Triangle Neighborhood Association. Request for Painted Safety Zones rescinded due to geometric conflict with turning vehicles.
- July 29, 2021: SFMTA (Eddie Tsui) met virtually with Supervisor Mandelman’s office (Jacob Bintliff) and Duboce Triangle Neighborhood Association to review updated design. Received continued support for the proposal and request for Painted Safety Zones.
- March 11, 2021: SFMTA (Bryant Woo) met virtually with Supervisor Mandelman’s office (Jacob Bintliff) and Duboce Triangle Neighborhood Association to discuss proposed 14th Street road diet between Castro Street and Sanchez Street and review draft design. Received strong support for the proposal.

SCHEDULE DETAILS

This project requires approval of traffic and parking by the SFMTA Board of Directors, and is expected to be scheduled for a Board meeting date by the end of 2021.

Outreach:

- (Tentative) November/December 2021: Proposal to be scheduled for final approval at a SFMTA Board of Directors meeting. The public will have an opportunity to make comments at this meeting.
- (Tentative) October 2021: Proposal to be scheduled for Public Hearing to hear comments. Flyers with information on joining the Public Hearing will be posted along the project limits.

San Francisco County Transportation Authority Allocation Request Form

FY of Allocation Action:	FY2021/22
Project Name:	Schools Engineering Program FY21/22 Cycle
Grant Recipient:	San Francisco Municipal Transportation Agency

EXPENDITURE PLAN INFORMATION

PROP K Expenditure Plans	Traffic Calming
Current PROP K Request:	\$925,000
Supervisory District	Citywide

REQUEST

Brief Project Description

Schools engineering is an annual program within San Francisco's Safe Routes to School program. Scope of work includes the planning, design and construction of signage and pavement marking upgrades and traffic calming measures at various school sites citywide. This program cycle consists of two sub-programs: 1) School Traffic Operations Signage and Markings at up to 35 schools citywide; and 2) School Loading Zone Traffic Calming on up to 15 residential streets where school loading zones exist. SFMTA also will complete 6 delayed Walk Audits from previous cycles (funded by prior allocations).

Detailed Scope, Project Benefits and Community Outreach

See attached scope description.

Project Location

K-12 schools citywide

Project Phase(s)

Planning/Conceptual Engineering (PLAN), Design Engineering (PS&E), Construction (CON)

Justification for Multi-phase Request

Multi-phase allocation is recommended given overlapping schedules of the planning, design and construction phases at different school locations.

5YPP/STRATEGIC PLAN INFORMATION

E6-14

Type of Project in the Prop K 5YPP/Prop AA Strategic Plan?	Named Project
Is requested amount greater than the amount programmed in the relevant 5YPP or Strategic Plan?	Less than or Equal to Programmed Amount
Prop K 5YPP Amount:	\$925,000

The San Francisco Municipal Transportation Agency (SFMTA) requests an allocation of \$925,000 in Prop K funds for the Schools Engineering Program FY21/22 Cycle. This allocation will fund planning, design and construction of:

- **School Traffic Operations Signage and Markings Sub-Program:** New and upgraded signage and pavement/curb markings at up to 35 school sites citywide; and
- **School Loading Zone Traffic Calming Sub-Program:** Traffic calming measures on loading zone streets at up to fifteen K-12 schools in San Francisco.

Note the following for the **School Walk Audits Sub-Program:** This sub-program was included in the two previous allocations; however, the SFMTA does not recommend including a new round of Walk Audits as part of this allocation request to allow time for staff to complete six Walk Audits from the FY19 and FY20 program cycles that have been delayed by the COVID-19 pandemic and associated school closures. SFMTA anticipates resuming this sub-program on an annual basis in the FY22/23 program cycle, when five new school sites will be selected.

San Francisco Safe Routes to School Program (SF-SRTS)

In July 2019, the SFMTA transitioned into the role of program lead for the SF-SRTS Non-Infrastructure Program, which was intended to strengthen the connection between the city's various engineering and non-infrastructure efforts.

The overall City SF-SRTS Program is delivered through a partnership composed of four City Agencies (SF Environment, SFMTA, San Francisco Department of Public Health (DPH), and SFUSD) and four local non-profit partners (San Francisco Bicycle Coalition, Walk San Francisco, Tenderloin Safe Passage, and the YMCA's Y-bike program).

The SF-SRTS program has set a goal for increased safety. Vision Zero is the City's road safety policy to eliminate all traffic deaths in San Francisco. While school-related traffic deaths are very rare, students still experience safety challenges travelling to, from and around schools. Thus, the program has set a goal of reducing collisions and injuries around schools. Collectively, the various sub-programs of the Schools Engineering Program described below will contribute towards these safety goals around city schools as part of the overall SF-SRTS.

E6-16

Schools Engineering Program

For the purposes of SF-SRTS, “Engineering” is used to describe planning work and physical engineering. The scope of this FY21/22 Schools Engineering program cycle fund request includes all K-12 schools in San Francisco (public and private) and is focused on two distinct areas of work (the School Traffic Operations Signage and Markings Sub-Program and the School Loading Zone Traffic Calming Sub-Program) to create a safer on-street environment. Work in this program is both proactive and responsive. Proactive work will identify potential problem areas to address while engaging communities for added input and review, including students and families. The responsive work will follow a more traditional approach of responding to community concerns as they are raised.

Under the management of the SFMTA’s Livable Streets subdivision, this program has reintroduced school-area walk audits (not included in this allocation request), where school communities can walk the neighborhood around a school with SFMTA staff, to collaboratively identify safety and traffic operations issues. Once issues are identified, a plan will be put into place for mitigations that can be implemented relatively quickly to address these concerns.

School Traffic Operations Signage and Markings Sub-Program

The SFMTA receives requests for field inspections and improvements through several channels including, but not limited to, 311, referrals from the SFUSD liaison, and observations from SFMTA crossing guards. This information is collected by the SFMTA’s school safety engineer. Based on this information, the SFMTA assesses traffic conditions at schools through:

- Site visits to assess the pickup and drop-off activity at the school site.
- Review of and documentation of traffic calming devices at school sites (e.g., signs, pavement/curb markings, crosswalks, and curb painting).
- Review of collision data.

Based on the above analysis, the SFMTA will design upgraded or new pavement/curb markings and signage. For the FY18/19 cycle, the first year of the Schools Engineering program, the SFMTA evaluated 33 school sites and issued approximately 43 work orders for improvements. For the FY19/20 program cycle, which is still ongoing, SFMTA estimates up to 41 school sites will be improved through signage and/or markings. See attachment for the list of locations and status of implementation for the FY18/19 and FY19/20 program cycles.

For the current FY21/22 cycle request the SFMTA will also review and implement new/upgraded markings and signage at the school sites along with traffic calming

measures, implemented as part of the School Loading Zone Traffic Calming Sub-Program, as further detailed below.

Outreach: SFMTA's school safety engineer will work directly with school officials to address safety concerns related to loading activities adjacent to schools.

Design: SFMTA's school safety engineer will develop recommendations for safety improvements based on site visits to each school in question. Measures are limited to new or upgraded signs, striping and curb markings.

Construction: SFMTA shops will implement recommended measures based on direction from the SFMTA school safety engineer.

School Loading Zone Traffic Calming Sub-Program

For the FY18/19 cycle, which was the first year of the Schools Engineering program, the SFMTA evaluated 20 school sites and constructed 31 traffic calming measures. For the FY 19/20 program cycle the SFMTA evaluated 21 school sites and has recommended 30 traffic calming measures for implementation – at the time of this writing, those measures are being legislated, after which they will be handed off to Public Works or an as-needed private contractor for construction. See attachment for the list of locations and status of implementation for the FY18/19 and FY19/20 program cycles.

For the current FY21/22 cycle request the SFMTA will again establish a citywide list of school sites in priority order for traffic calming measure improvements (see below for evaluation factors). The School Loading Zone Traffic Calming sub-program will allow the SFMTA to refine and verify this list annually, coordinate efforts with the School Walk Audits sub-program, develop a subset of school site priorities with appropriate traffic calming measures, and ultimately deliver those measures.

Prioritized school sites on the citywide list will be identified based on collision and enrollment data as well as observed traffic speeds. Collision data is from TransBASE, a collision database developed by the Department of Public Health in collaboration with SFMTA, the San Francisco Police Department, and the Office of the Controller. Enrollment data is gathered from SFUSD for public schools, and from schools directly or from the California Department of Education for private schools. The SFMTA will ensure geographic equity by prioritizing measures at the highest-ranking school site in each of the 11 supervisorial districts first, then installing measures at the next highest-ranking sites citywide.

Outreach: During the planning phase, SFMTA will outreach to residents near the school site (residents of blocks where traffic calming measures are being proposed) to inform them of the project, as well as school staff and SFUSD more generally. The SFMTA will

E6-18

also perform outreach to other stakeholders, including the San Francisco Fire Department, Muni, and SFMTA Accessible Services.

Design: Once the project list is established as part of the planning phase, SFMTA staff will complete design for each of the proposed traffic calming measures and carry each measure through the SFMTA legislation review and approval process, which includes the Transportation Advisory Staff Committee (TASC) and an SFMTA Engineering Public Hearing for final approval and environmental clearance. Outreach during the design phase will consist of targeted communication with fronting property owners where necessary and the standard public notification process associated with Engineering Public Hearings.

Construction: For sites ranked and prioritized for traffic calming measures, the SFMTA anticipates constructing approximately two traffic calming devices per school site, depending on the length of the loading zone block. In addition to supporting signage and pavement markings, traffic calming devices likely to be recommended as part of this program include speed humps, speed cushions, speed tables and raised crosswalks.

School Walk Audits Sub-Program

As stated above, the SFMTA does not recommend including a new round of Walk Audits as part of this allocation request, which will allow time for staff to complete six Walk Audits from the FY19 and FY20 program cycles that have been delayed by the COVID-19 pandemic and associated school closures. SFMTA anticipates resuming this sub-program on an annual basis in the FY22/23 program cycle, when five new school sites will be selected. See attachment for the list of locations and status of implementation for the FY18/19 program cycle. SFMTA is currently developing the FY19/20 Walk Audit school list.

Schools Engineering Program Summary

The following table summarizes the approximate number of sites to be evaluated and the approximate number of engineering measures to be constructed as part of the FY21/22 program cycle:

Schools Engineering Program Sub-Program	# School Sites Evaluated (approximately)	# Measures Constructed (approximately)
School Traffic Operations Signage & Markings	35	105
School Loading Zone Traffic Calming	15 ⁽¹⁾	35 ⁽²⁾
School Walk Audits Sub-Program will resume with the FY22/23 program cycle.		

(1) Assumes ten schools with one block each and five with two blocks each.

(2) Assumes fifteen blocks with two measures each and five with one measure each.

Of the total amount requested:

- **Planning/Preliminary Engineering:** \$82,500 will fund planning efforts, including:
 - Site visits and data collection efforts, including up to 25 speed surveys
 - Develop preliminary designs for signage/markings upgrades and traffic calming devices

- **Design:** \$82,500 will fund design efforts, including:
 - Targeted community outreach and ongoing communication
 - Finalize recommended signage/markings upgrades and traffic calming measures
 - Review and approval process including environmental clearance (legislation)
 - Prepare and update striping drawings
 - Prepare and submit work orders

- **Construction:** \$760,000 will fund construction efforts, including:
 - Pre-mark devices in the field
 - Construction by SFPW and/or private contractor where needed to supplement SFPW's capacity

PROP K EP-138	\$0	\$82,500	\$0	\$0	\$0	\$82,500

Deliverables

- Quarterly progress reports (QPRs) shall: provide the percent complete for planning; provide updated draft lists of ranked locations and recommended improvements for each of the two engineering focus areas: Traffic Operations Signage and Markings and Loading Zone Traffic Calming; describe outreach performed the prior quarter and planned for the upcoming quarter (e.g. list of schools contacted, schools with surrounding neighbors contacted, etc); describe the results of site visit evaluations; and describe the project development activities performed in the prior quarter in addition to the standard requirements for QPRs (see Standard Grant Agreement for details).
- On completion of the planning phase (anticipated December 2022), SFMTA will provide the citywide prioritized list of schools with recommended treatments (e.g. list of improvements by school) for each of the two engineering focus areas: Traffic Operations Signage and Markings and Loading Zone Traffic Calming.

San Francisco County Transportation Authority Allocation Request Form

FY of Allocation Action:	FY2021/22
Project Name:	Treasure Island Supplemental Transportation Study [NTIP Planning]
Grant Recipient:	San Francisco County Transportation Authority

EXPENDITURE PLAN INFORMATION

PROP K Expenditure Plans	Transportation/Land Use Coordination
Current PROP K Request:	\$100,000
Supervisory District	District 06

REQUEST

Brief Project Description

Study including stakeholder engagement and data analysis to understand Treasure Island resident and worker transportation needs, outline recommended short-term public transit improvements and plan for supplemental transportation options to fill identified gaps in service. This could take the form of an on-demand shuttle, shared van, and/or ride-share subsidy. Each option requires more conversations with residents, workers and service providers to understand new realities after the pandemic, potential barriers to use and how to overcome those barriers.

Detailed Scope, Project Benefits and Community Outreach

Purpose:

To understand Treasure Island resident and worker transportation needs, outline recommended short-term public transit improvements and plan for supplemental transportation options to fill identified gaps in service.

Proposed Project Leads:

This project will be a partnership between SFCTA/TIMMA (the Prop K sponsor) and One Treasure Island (One TI), a non-profit community-based organization. One TI's mission is to create a vibrant, inclusive community on Treasure Island that provides pathways for economic advancement for lower-income San Franciscans, including those who have experienced homelessness (onetreasureisland.org). One TI was established in 1994, and is the umbrella organization for all of the non-profit and supportive housing providers on the Island. One TI has been TIMMA's lead partner for community outreach, engagement and communications.

Background:

Treasure Island is a unique San Francisco neighborhood where residents are reliant on travel over the Bay Bridge to access resources on the mainland. The island was identified by SFCTA as a Community of Concern where 33.7% have no access to a vehicle for off-island trips (Census Bureau American Community Survey 2019 5yr Estimates). Currently, the only public transportation option is the Muni 25 bus, which has only one stop in Downtown San Francisco.

The Island is undergoing a major redevelopment which will grow the population from approximately

E6-34

2,000 residents up to 20,000. Planned transportation improvements include a new ferry service to and from the San Francisco ferry terminal; new AC Transit bus service to and from downtown Oakland BART stations; and expanded Muni service. These transit improvements are planned to be phased in over time. In the interim prior to full project build-out, improvements to public transportation services and supplemental transportation options are needed to better serve low-income residents and workers without access or with limited access to a vehicle.

An initial survey of supportive housing providers conducted by One Treasure Island in 2019 noted limited access for lower-income residents to several key destinations such as grocery stores/shopping, recreation, schools and healthcare. The need to transfer sometimes multiple times is particularly cumbersome for those with children or carrying items such as groceries. This daily reality for Treasure Island residents signals the need for direct, on-demand service options to destinations within a designated service area in San Francisco including discount stores, major healthcare centers and schools serving island youth. This could take the form of an on-demand shuttle, shared van, and/or ride-share subsidy. Each option requires more conversations with residents, workers and service providers to understand new realities after the pandemic, potential barriers to use and how to overcome those barriers.

Schedule:

The project is anticipated to be a 6-month process beginning in Fall 2021 and concluding in Summer 2022.

Proposed Project Scope:

Task 1: Project Management

The project will be managed in partnership between SFCTA/TIMMA and One TI. Consultant procurement may include the use of one or more of the Authority's on-call consultant teams.

Task 1 Deliverables:

- *Consultant Contract(s)*
- *Refined Workplan*
- *Bi-weekly project management meetings between SFCTA/TIMMA, One TI, and selected consultant.*

Task 2: Stakeholder Engagement

The project team will engage residents and workers to understand their current travel patterns, public transit use and concerns, and supplemental transportation preferences and barriers. A transportation needs questionnaire will be developed and focus groups will be conducted with residents and workers. The questionnaire and focus groups will be offered in English, Spanish, and Chinese, with another language as optional. SFMTA will be included as a stakeholder agency regarding Muni 25 service improvements. Interested participants from stakeholder focus groups will be invited to form a working group to help review and refine preliminary recommendations.

One TI will lead this task, including stakeholder outreach, oversight of any consultants used to design the questionnaire and the focus groups, as well as oversight of questionnaire and focus group execution. The questionnaire will be distributed by various means including online and hard-copy distribution, and through intercept surveys at multiple locations on-Island. One TI will consult SFCTA for input on the questionnaire and focus group methodology and questions.

Task 2 Deliverables:

- *Stakeholder Engagement Strategy*
- *Transportation Needs Questionnaire and Results Memo*
- *Stakeholder Focus Group Meetings and Summary Memo*
- *Stakeholder Working Group Formation*

Task 3: Updated Data Collection

Treasure Island community transportation data was last collected by SFCTA in 2015. The project team will update data on resident and worker travel patterns and mode share based on the results of the questionnaire and additional research. This scope anticipates summarizing existing data (e.g., SFMTA transit ridership data, Census American Community Survey Data, and SF CHAMP travel diaries), as well as summarizing new data collected through the community questionnaire in Task 2.

SFCTA will lead this task, including oversight of any consultants used to design the data collection approach, as well as oversight of consultant data collection and summarizing. SFCTA will consult One TI for input on the data collection methodology and results.

Task 3 Deliverables:

- *Community transportation raw data and summary tables*
- *Data summary memo*

Task 4: Preliminary Findings and Recommendations

The project team will research best practices, develop recommendations for short-term improvements to public transportation, and evaluate potential supplemental transportation options to help fill gaps in public transit service. The team will present research, preliminary findings and recommendations to the stakeholder working group, TIMMA Board, TIDA Board and Citizens Advisory Board.

SFCTA will lead this task, including oversight of a consultant to provide evaluation and recommendations, with consultation and input from One TI. One TI will coordinate the stakeholder working group meeting(s).

Task 4 Deliverables:

- *Stakeholder Working Group Meeting(s)*
- *Preliminary Recommendations PowerPoint Presentation*
- *Presentations to TIMMA Board, TIDA Board and Citizens Advisory Board*

Task 5: Needs Assessment Report

The project team will create a needs assessment report including stakeholder input, updated community transportation data, and finalized recommendations for public transit improvements and supplemental transportation. The team will present a public review draft of the report to the stakeholder working group, TIMMA Board, TIDA Board and Citizens Advisory Board. The needs assessment report will be updated and finalized based on this guidance.

SFCTA will lead this task, including oversight of a consultant to prepare a Draft and Final Report, with consultation, input and review from One TI. One TI will coordinate the stakeholder working group meeting(s).

Task 5 Deliverables:

- *Administrative Draft Report*
- *Public Review Draft Report*
- *Needs Assessment PowerPoint Presentation*
- *Stakeholder Working Group Meeting*
- *Presentations to TIMMA Board, TIDA Board and Citizens Advisory Board*
- *Final Needs Assessment Report*

E6-36

Task 6: Supplementation Transportation Implementation Plan

Based on Tasks 1-5, SFCTA will complete an implementation plan that will include the cost and funding strategy to implement the preferred supplemental transportation option.

SFCTA will lead this task, including oversight of a consultant to prepare the Plan, with consultation, input and review from One TI.

Task 6 Deliverable:

- *Implementation and Funding Plan*

The Transportation Authority's Neighborhood Program (NTIP) is intended to strengthen project pipelines and advance the delivery of community-supported neighborhood-scale projects, especially in Communities of Concern and other neighborhoods with high unmet needs.

San Francisco County Transportation Authority Allocation Request Form

FY of Allocation Action:	FY2021/22
Project Name:	Potrero Gateway Loop Pedestrian Safety Improvements
Grant Recipient:	Department of Public Works

EXPENDITURE PLAN INFORMATION

PROP AA Expenditure Plans	Prop AA Pedestrian Projects
Current PROP AA Request:	\$220,000
Supervisory District	District 10

REQUEST

Brief Project Description

Revitalize and reconnect the Potrero Hill neighborhood separated by US 101 by creating a gateway and providing a safe passageway under the freeway overpass along 17th St from Vermont St to San Bruno Ave and along Vermont St and San Bruno Ave between 17th and Mariposa Streets, locations on San Francisco's Vision Zero High Injury Network. The project will improve pedestrian, bicyclist, and motorist safety and promote public health by widening sidewalks, constructing corner bulbouts, enhancing bike lanes, installing new street trees and rain gardens, and with roadway and parking modifications.

Detailed Scope, Project Benefits and Community Outreach

Public Works seeks Prop AA funds for the construction of pedestrian, bicyclist, and motorist safety improvements along 17th Street, Vermont Street, and San Bruno Avenue in District 10. This request follows the Prop AA funded design phase work for the project, approved by the Board in May 2020. Construction improvements are as follows:

Beneath the Freeway/17th Street

The project will reconnect the neighborhood separated by the US 101 freeway by creating a gateway along 17th Street, a corridor on San Francisco's Vision Zero High Injury Network. The gateway will provide an attractive, safe passageway under a freeway overpass with the following project elements:

- Widened sidewalk & retaining wall
- Parking lane removal
- Protected bicycle lane

Vermont Street

The Vermont Street project area, with great views of the city, offers significant open space. The project will remove a lane of traffic and install wider sidewalks increasing safety along Vermont Street and at the intersection with 17th Street, a location on San Francisco's Vision Zero High Injury Network. Project elements include:

- Widened sidewalk
- Pedestrian bulb-out

E6-44

- Retaining walls and planted terraces
- Flat plaza at the corner of 17th and Vermont Streets
- Sidewalk landscaping elements
- Roadway diet (3 to 2 lanes)

San Bruno Avenue

The project will build an inviting neighborhood connection with open space and enhanced pedestrian safety at the San Bruno Avenue and 17th Street intersection, a location on San Francisco's Vision Zero High Injury Network, with a new bulb-out at the southeast corner. Project elements include:

- Pedestrian bulb-out
- Retaining walls and planted terraces
- Flat plaza at the corner of San Bruno Avenue and 17th Street
- Sidewalk landscaping elements
- Parking modifications

See attachment showing current plan set for proposed improvements.

The project was initiated by the community organization, the Potrero Gateway Loop Steering Committee, which engaged a landscape architecture firm to lead a 6-month community planning process. In 2013, the neighborhood formed the committee to create a park out of public right-of-way. A neighborhood church opened its auditorium for the neighborhood to hold four design meetings in 2014, attended by over 100 people. After the conceptual design was completed in 2015, the community held a fundraiser, the proceeds of which were used to hire a firm to provide an initial construction cost estimate. The community engaged the D10 Supervisor and Public Works assigned a Project Manager to assist the Steering Committee. Project sponsors have met with Caltrans engineers five times to provide a high-level review of the conceptual design and to determine which parts of the project would be approved by Caltrans.

SFPW has met with the Potrero Gateway Steering Committee (community organization championing improvements in the area) and Dogpatch & NW Potrero Hill Green Benefit District (special assessment district local non-profit organization) monthly throughout the planning and design phases.

Prop AA funds for the construction phase will leverage Eastern Neighborhood developer impact fees and a grant from the state Affordable Housing and Sustainable Communities (AHSC) program.

SCHEDULE DETAILS

SFPW is currently working with Caltrans for review and approval of the project design through their Encroachment Permit process. Currently targeting 100% design milestone in October 2021. The requirements for the AHSC grant include that construction contract must be advertised prior to December 31, 2021 and funds must be expended by December 31, 2023.

Coordination and outreach with the Potrero Gateway Steering Committee (community organization championing improvements in the area) and Dogpatch & NW Potrero Hill Green Benefit District (special assessment district local non-profit organization) and the greater community will continue regularly throughout the project, in addition to SFPW creating a project website to provide updates.

The project seeks to make changes through two means:

- Streetscape Improvements: SFPW implementation and the subject of this allocation request.
- Caltrans Improvements: SFPW is coordinating with Caltrans and working with the community to develop a master plan for possible future work and helping the community plan and coordinate work for Caltrans to perform (landscaping along the embankment, fence replacement, soil stabilization under the freeway, cleaning and painting under the freeway).

Caltrans Improvements includes coordination with several upcoming Caltrans lead projects taking place including: Cleaning/Painting Freeway Underpass (planned Fall 2021 - pending confirmation from Caltrans) and Soil Stabilization (TBD). Schedules are pending continued discussions with Caltrans and will not impact the Streetscape Improvements.

Sponsor:	Department of Public Works	Expiration Date:	12/31/2023
Phase:	Construction	Fundshare:	10.95%

Cash Flow Distribution Schedule by Fiscal Year

Fund Source	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	FY 2025/26	Total
PROP AA EP-702	\$110,000	\$110,000	\$0	\$0	\$0	\$220,000

Deliverables

1. Quarterly progress reports (QPRs) shall include % complete to date, improvements in progress or completed by location, upcoming project milestones (e.g. ground-breaking, ribbon-cutting), and delivery updates including work performed in the prior quarter, work anticipated to be performed in the upcoming quarter, and any issues that may impact delivery, in addition to all other requirements described in the Standard Grant Agreement (SGA).

2. With the first QPR, Sponsor shall provide 2-3 photos of typical before conditions; with the first quarterly report following initiation of work, Sponsor shall provide a photo documenting compliance with the Prop AA attribution requirements as described in the SGA; quarterly reports shall include photos of work being performed; and upon completion of the project, Sponsor shall provide 2-3 photos of completed work.

Special Conditions

1. SFPW may not incur expenses for the construction phase until Transportation Authority staff releases the funds pending receipt of evidence of completion of 100% design (e.g. copy of certifications page).
