	Consider increasing to maintain and improve	Potential increase in P1 from Caltrain (see			
BART Maintenance	=	note below)			
	·	How flexible is the \$100 million for Caltrain			
		maintenance? Just comparing it to the			
		allocation for BART maintenance in the			
		context table, the funding needs seem			
		basically equivalent for both systems, but			
		the Caltrain allocation is much higher. I			
		would support shifting some of the Caltrain			
		maintenance funding over to BART in			
		Priority 1, as long as the Caltrain allocation is			
		still relieving SFMTA in the short-to-medium			
		term from paying SF's member			
		contributions to the PCJPB out of their	Interest in decreasing		
Caltrain Maintenance		operating budget.	funding		
	Should add funds to support and expand ferry				
Ferry Maintenance	service to diversify transit options				
	Would like to see how these funds have been				
	used in the past to illustrate how they might be				
	used in the future.				
	Could these funds be allocated to specific line				
	items now?	Okay to decrease (not more than \$30M);			
Transit Enhancements	How was \$38.1 determined?	backfill in P2 if possible			
	Why is this a separate line item if the same				
	projects are eligible for BART maintenance and				
	Transit enhancements?				
	Could this be labeled to support improvements				
BART Station Access, Safety	to the rider experience, such as safety ambassadors, bathroom//elevator attendants,				
and Capacity	etc?

PARATRANSIT					

		1		
	If the consensus of the committee is to support a large portion of Priority 2 funding going to Paratransit (as suggested in all three January 13 scenarios), I will support it. My only wonder is whether this is an appropriate use of the Priority 1/Priority 2 distinction, given that Paratransit funding is mostly covering operating costs, which are less flexible year-over-year. I would support making most of the increases we want to make to Paratransit funding in Priority 1, and focus Priority 2 funding on programs that have less immediate needs but may require much higher levels of funding in the future (for example, Next Gen transit investments,	Interest in increasing

		Okay reducing P1 by \$5M, making up for it		
		in P2; expand eligibility to include "planning		
Managed Lanes and Express		and implementation of transit-only lanes,		
	Keep as is	pending changes to Caltrans restrictions"		
Dus	Neep 43 13			
		Within the timespan of the EP, would it be		
		worth prioritizing this item, which I see as		
		potentially being a key equity priority if		
		implemented justly, for Priority 2 funding? I		
		would be supportive of a pretty high		
		proportion of Priority 2 funding going here,		
		and an increase in Priority 1 funding if		
		possible (if push comes to shove though, I		
		would rather Priority 1 focus on transit
