Brief Project Description

Repairs to mitigate water intrusion in the tunnels along BART's M-line between Embarcadero Station and 24th/Mission Station. The M-line was constructed over 50 years ago and has sections that are either steel-lined or are concrete. Currently, water seeps into the steel-lined tunnel areas via joints of the tunnel and into the concrete areas through cracks. The Project's goal is to mitigate this water intrusion with repairs in the concrete and curtain grouting in the steel areas. These repairs will increase safety and security for customers, employees, and train operations.

Detailed Scope, Project Benefits and Community Outreach

Project Details: The Project will perform repairs to mitigate water intrusion in the tunnels along BART's M-line. The M-line was constructed over 50 years ago and runs from the Oakland Wye across West Oakland, through the Transbay Tube into downtown San Francisco, and through the Market Street Subway to Daly City. The M-line tunnel has sections that are either steel-lined or are concrete. Currently, water seeps into the steel-lined tunnel areas via the joints of the tunnel, and water seeps into the concrete tunnel areas through the cracks of the concrete.

The Project's goal is to mitigate water intrusion in the concrete and steel areas of the tunnel. The project will perform curtain grouting in the steel lined areas and will repair cracks in the concrete areas. The Project's work will mitigate current water seepage in the underground structures to increase safety and security for customers, employees, and train operations. The Project is currently in the design phase and will be ready for construction by the fall of 2022. The Project's work will be performed by both BART staff and contractors. BART estimates the Project will be completed by May of 2027.

Project Location: The Project's area extends from the Embarcadero Station area to the 24th Street Mission Station area (see figures 1 and 2 in Attachment 1). The Project will take place underground in the Financial, South of Market, and Mission District areas, where there is a high density of Equity Priority Communities (see figure 3 in Attachment 1).

See Attachment 1 for more details and figures.

M-Line Tunnel Water Intrusion Mitigation Project

ATTACHMENT 1

Project Details

Detailed Scope of Work (goals, scope, current conditions, benefits)

The Project will perform repairs to mitigate water intrusion in the tunnels along BART's M-line. The M-line was constructed over 50 years ago and runs from the Oakland Wye across West Oakland, through the Transbay Tube into downtown San Francisco, and through the Market Street Subway to Daly City. The M-line tunnel has sections that are either steel-lined or are concrete. Currently, water seeps into the steel-lined tunnel areas via the joints of the tunnel, and water seeps into the concrete tunnel areas through the cracks of the concrete.

The Project's goal is to mitigate water intrusion. In the concrete and steel areas of the tunnel, the project will perform curtain grouting in the steel lined areas and will repair cracks in the concrete areas. The Project's work will mitigate current water seepage in the underground structures to increase safety and security for customers, employees, and train operations. The Project is currently in the design phase and will be ready for construction by the fall of 2022. The Project's work will be performed by both BART staff and contractors. BART estimates the Project will be completed by May of 2027.

Location

The Project's area extends from the Embarcadero Station area to the 24th Street Mission Station area, see figures 1 and 2. The Project will take place underground in the Financial, South of Market, and Mission District areas, where there is a high density of Equity Priority Communities as seen in figure 3.

San Francisco County Transportation Authority Allocation Request Form

FY of Allocation Action:	FY2022/23
Project Name:	Paratransit
Grant Recipient:	San Francisco Municipal Transportation Agency

EXPENDITURE PLAN INFORMATION

PROP K Expenditure Plans	Paratransit
Current PROP K Request:	\$13,300,000
Supervisory District	Citywide

REQUEST

Brief Project Description

The SFMTA provides paratransit services to persons with disabilities, in compliance with the Americans with Disabilities Act. Since 2003 Prop K has been a major fund source for SFMTA's Paratransit operations. This request will fund the paratransit broker contract. The FY22/23 budget includes previously allocated Prop K funds for its Shop-a-Round and Van Gogh shuttle programs and its Wheelchair Accessible Ramp Taxi Incentive program. These programs are critically important to persons with disabilities and the elderly who are unable to fully utilize other forms public transportation.

Detailed Scope, Project Benefits and Community Outreach

See attached background and detailed scope.

5YPP/STRATEGIC PLAN INFORMATION

Type of Project in the Prop K 5YPP/Prop AA Strategic Plan?	Named Project
Is requested amount greater than the amount programmed in the relevant 5YPP or Strategic Plan?	Less than or Equal to Programmed Amount
Prop K 5YPP Amount:	\$13,300,000

Request

The SFMTA requests \$13,300,000 in Proposition K (Prop K) funds to support the estimated \$33.1 million cost for Fiscal Year 2022/23 of SFMTA's contract with the broker that administers the Paratransit program. This is an annual request for paratransit operations. The Prop K Strategic Plan includes \$13,300,000 in programming for the Paratransit program in Fiscal Year 2022/2023. The Fiscal Year 2022/23 Paratransit budget also includes Prop K funds previously allocated for the Shop-a-Round and Van Gogh shuttle programs (\$16,832) and the Wheelchair Accessible Vehicle Incentives program (\$40,000). These funds were allocated for the same programs in previous years and Transportation Authority staff has administratively approved amendments to the previous grants (Standard Grant Agreements 123-910022 and 123-910023) to extend the grant expiration dates to allow unused funds to be used in Fiscal Year (FY) 2022/23.

Background

The SFMTA provides paratransit services to persons with disabilities, in compliance with the Americans with Disabilities Act (ADA). Paratransit services are provided to persons with disabilities who are unable to independently ride bus or light rail service some or all of the time and are certified eligible according to federal criteria. Paratransit in San Francisco is administered by a broker that delivers service through a diverse set of providers and resources, including 100 city-owned vehicles that are less than 5 years old, private taxis and group vans associated with community-based organizations throughout the city. On June 14, 2016, the Board of Supervisors approved a contract with Transdev to provide paratransit broker services through June 30, 2021, with an option for a five-year extension, and in an amount not to exceed \$142,902,104. On May 14, 2021, the Board of Supervisors approved exercising the option for the five-year extension recommended by the SFMTA Board and increased the not to exceed amount to \$308,271,023.

SFMTA's FY22/23 Paratransit Program budget includes its Wheelchair Accessible Ramp Taxi Incentive Program, which has proven to be a successful strategy for improving access and the quality of paratransit ramped taxi services. Due to the COVID-19 pandemic there has been lower demand for the taxi incentives, and SFMTA has included \$40,000 in cost savings in its FY22/23 budget to address continued interest from ramp taxi drivers.

SFMTA's FY22/23 Paratransit Program budget also includes its Shop-a-Round and Van Gogh shuttle programs. The Shop-a-Round shuttle is a van and taxi service for individuals who do not qualify for ADA Paratransit but have difficulties using public transit for grocery shopping. The Van Gogh shuttle provides group transportation for seniors and people with disabilities to social and recreational activities in San Francisco. Due to the COVID-19 pandemic there was lower demand for Shop-a-Round service and the SFMTA temporarily suspended the Van Gogh service. Resulting cost savings total \$16,832 in Prop K funds, which SFMTA has included in its FY22/23 budget, as the Van Gogh service will be resuming service in FY22/23 and SFMTA will continue to offer the Shop-a-Round service.

Detailed Description of Services

• Paratransit Services

The paratransit broker services include determination of client eligibility, customer service, overseeing and monitoring the operation of the taxi debit card system, procuring, subcontracting, and oversight of van and taxi services, and reporting and record keeping. Transdev itself operates the SF Access service and a portion of the Group Van services. All other transportation services for which the broker is responsible are procured via contracts with other providers. In addition, the broker is responsible for the continued development and implementation of the mobility management program, including activities to make it easier for San Francisco's disabled and senior residents to navigate the transportation services available to them, including the Shop-a-Round and Van Gogh shuttles and Ramp Taxi Incentives programs. The broker also administers the Essential Trip Card (ETC) program, which was initiated in response to the COVID-19 pandemic and reduced Muni service and will continue through FY22/23. Approximately 700,000 paratransit trips are projected to be provided to 12,000 registered ADA eligible consumers with another approximately 85,000 ETC taxi trips to be provided to about 4,800 seniors and persons with disabilities in FY 2022/23.

Specific paratransit services are described below:

- 1) Taxi **(included in FY22/23 Prop K request)** – Provides individual paratransit taxi trips to ADA-eligible paratransit users using both sedans and wheelchair accessible ramped taxis.
- 2) SF Access **(included in FY22/23 Prop K request)** – Provides pre-scheduled, shared-ride door-to-door van service in City-owned vehicles for ADA eligible paratransit users.
- 3) Intercounty **(included in FY22/23 Prop K request)** – Pre-scheduled paratransit trips provided to paratransit users to or from Muni's service area in San Francisco, to or from destinations in Alameda County, Marin, and Contra Costa County. These trips are provided by the East Bay Paratransit Consortium and Marin Access.
- 4) Group Van **(included in FY22/23 Prop K request)** – Provides pre-scheduled group trips for ADA-eligible paratransit users who are going to a common destination such as an Adult Day Health Centers, developmentally disabled work sites, senior nutrition programs etc.
- 5) Department of Aging and Adult Services Group Van **(included in FY22/23 Prop K request)** – Provides pre-scheduled group van services to senior centers funded by the Department of Disabled and Aging Services.

The SFMTA Paratransit program includes the following non-ADA transportation services operated by the SF Paratransit program:

• Wheelchair Accessible Taxi Incentive Program

This program provides financial incentives to increase the supply of accessible wheelchair ramp taxis available through the Paratransit program, but the additional ramp taxis will also be in general circulation, increasing mobility options citywide for wheelchair users. The project provides up to \$300 per month as incentive to help with the capital cost of purchasing or converting a wheelchair accessible vehicle and an additional \$300 per month to help pay for the

associated increase in fuel and maintenance costs. Incentives will be distributed monthly if all the following conditions are met:

- a. Driver/Company has purchased a converted wheelchair accessible ramped vehicle.
- b. Vehicle must perform at least 20 verified San Francisco Paratransit wheelchair trips in the month.
- c. Must be logged into an SFMTA-approved mobile app with ramped taxi option for at least 80 hours each month.
- d. Must submit log of all non-paratransit wheelchair trips provided by the vehicle each month.
- e. Medallion and Vehicle must be in good standing with SFMTA.

SFMTA is also temporarily changing the definition of a “used” wheelchair accessible vehicle by allowing vehicles within three model years (versus two model years) to participate in the program. This is due to feedback from prospective participants who have indicated difficulties finding vehicles within two model years.

Over FYs 18/19 - 21/22, the Transportation Authority allocated Prop K and programmed Lifeline Transportation Program funds for the Accessible Taxi Incentive program, operated by SFMTA’s Paratransit program. Because of continued interest from ramp taxi drivers, SFMTA would like to continue to fund this program in FY22/23 using \$40,000 in previously allocated Prop K funds that were unneeded in the fiscal years for which they were budgeted.

- **Shop-a-Round/Van Gogh**

The 2016 Assessment of the Needs of San Francisco Seniors and Adults with Disabilities, completed by the San Francisco Department on Aging and Adult Services, found that over ten percent of seniors had difficulties with daily activities, including grocery shopping. While they may be able to take Muni independently, they may not be able to navigate the transit system carrying shopping bags. The Shop-a-Round service seeks to address this issue by providing group van transportation to and from grocery stores with driver assistance in carrying grocery bags.

In addition, the requested funds will pay for the operational cost of the Van Gogh service. This program provides pre-scheduled van service to groups of seniors and/or persons with disabilities to attend social and recreational events and activities in San Francisco. This service was temporarily suspended during the COVID-19 pandemic due to social distancing requirements that would not make this service feasible; however, those requirements have since been lifted and there has been some interest from community organizations that use this service to re-engage seniors and people with disabilities in social and recreational activities.

SFMTA’s FY22/23 Paratransit request also includes \$16,832 for its Shop-a-Round shuttle program. The Shop-a-Round service continues to operate as a van and taxi service for individuals who do not qualify for ADA Paratransit but have difficulties using public transit for grocery shopping. The Van Gogh service will be resuming service in FY22/23. These funds will allow SFMTA to continue to fund this program in FY22/23 using previously allocated Prop K funds that were unneeded in the fiscal years for which they were budgeted.

- **Essential Trip Card**

This non-ADA program was not Prop K funded in FY21/22 and will not be Prop K funded in FY22/23, but will continue to operate in FY22/23. The service provides seniors and people with disabilities with taxi services to enhance mobility to complete essential trips. From July – April 2022, about 70,000 trips have been performed with 4,800 individuals registered. Due to one-time pandemic-related funds and a Lifeline grant, SFMTA is not requesting that Prop K fund this service in FY22/23.

Public Outreach

For the Ramp Taxi Incentive program, SFMTA will continue to work with community-based organizations and local government agencies to increase awareness of the incentives that will be paid to ramp taxi drivers to increase the availability of taxis to the wheelchair community. Accessible Services will continue to work with Taxi Services to promote this incentive program taxi drivers. Staff will also be working with previous recipients, whose 36-month term has expired, to see if they are interested in purchasing another new/used ramp accessible vehicle.

The Shop-a-Round program remains an integral part of the services available to the senior and disabled community. The SFMTA Mobility Management team continues to information about it in its outreach efforts to the community. In addition, this program complements the CHOICE program, which seeks to provide transportation services to public health clients to promote better health outcomes.

Service Impacts Due to the COVID-19 Pandemic

While the COVID-19 pandemic continued into FY21/22, the overall trips performed for the SF Paratransit program did slightly increase from FY20/21 and was about two-thirds of pre-pandemic trip figures.

SFMTA expects ridership to increase with slight ebbs as individuals continue to evaluate their comfort level in engaging in social activities.

For the SF Access service, ridership is at about 70% of pre-pandemic levels. The majority of trips continue to be for medical purposes or dialysis. While masks are no longer required to be worn while being transported, they are recommended for SF Access passengers. The only COVID-related safety measure still in place is the six-foot separation requirement between the driver and any rider while being transported, per CAL/OSHA guidelines.

SF Paratransit Taxi have seen a decline during the COVID pandemic, with an approximately 30% reduction in trips completed to ADA Paratransit clients. However, when ETC taxi trips are included, the number of taxi trips completed in FY21/22 matches pre-COVID levels.

SFMTA Group Van service gradually resumed service as agencies continued to slowly reopening their centers to in-person activities. While trip numbers are down 83%, SFMTA expects Group Van service to increase in FY22/23 as state regulators have indicated that centers that receive funding must resume in-person activities by July 1, 2022. SFMTA and SF Paratransit continue to communicate with these agencies regarding their reopening plans and are working to develop routes for their clients.

In addition to the ADA Paratransit service, the Paratransit program operates several non-ADA transportation services as well. Shop-a-Round van and taxi service continues to operate. The Van Gogh recreational shuttle will resume service in FY22/23.

As part of San Francisco's COVID pandemic response, SF Paratransit has taken on additional services requested by the City's Emergency Operations Center. These services will continue to operate on a limited basis as the Department of Public Health and Department of Homelessness and Supportive Housing evaluate their transportation needs moving forward.

- Emergency Medical Transportation Service **(not Prop K funded)** – transporting PUIs to sheltered housing sites on an as-needed basis
- Pier 94 Shuttle **(not Prop K funded)** – daily shuttle between Pier 94, a city operated sheltering site, and two key transit/shopping points in the Bayview neighborhood
- Essential Trip Card Program – taxi program available to all seniors/individuals with disabilities who need to complete essential trips but have been affected by Muni service reductions

Cost Impact of the COVID-19 Pandemic

The increased projected cost in FY22/23 in the Paratransit contract comes from anticipated increases in employee wages as the SF Access contractor, Transdev, is expected to finalize a new agreement with their unions. SFMTA also anticipates trip numbers to increase with the anticipate resumption of in-person activities at our Group Van agencies and increased confidence among SF Access and taxi riders to engage in more social and recreational activities. In FY 21/22 there are cost savings due to reduced demand from the ongoing COVID-19 pandemic. Following the close of the fiscal year, SFMTA will do a final reconciliation of expenditures and return unneeded funds to the Prop K program. SFMTA and SF Paratransit will continue to provide additional COVID-19 related services to the city in FY22/23 as long as there is available capacity. These include EMS transport of potential/confirmed PUI (Persons Under Investigation), the Pier 94 shuttle, and the Essential Trip Card (ETC) program. These new services have added some additional costs to the Paratransit expenditures but are being paid by other city departments and grant funding in FY 22/23.

Deliverables

1. Quarterly Progress Reports shall provide a service report of performance by mode, including the number of trips, number of complaints, on-time percentage, number of Paratransit program ramp taxi trips originating in Communities of Concern, number Paratransit wheelchair passenger trips made on taxi vehicles funded by the Ramp Taxi Incentives program, and the number of ramp taxi vehicle owners receiving the subsidy each month, in addition to the standard requirements described in the Standard Grant Agreement. The quarterly performance report shall also include average trip times for group van services, as evaluated by a sampling methodology.

Special Conditions

1. Prop K funds allocated to this project are only for eligible expenses incurred in the fiscal year for which the allocation was made (ending 6/30/23). After the deadline for submittal of final reimbursement requests or estimated expenditure accruals (estimated mid-July 2023), any remaining unclaimed amounts will be deobligated.

Notes

1. Prop K funds are for reimbursement of Paratransit contract expenses only.

San Francisco County Transportation Authority Allocation Request Form

FY of Allocation Action:	FY2022/23
Project Name:	Street Repair and Cleaning Equipment
Grant Recipient:	Department of Public Works

EXPENDITURE PLAN INFORMATION

PROP K Expenditure Plans	Street Repair & Cleaning Equipment
Current PROP K Request:	\$983,021
Supervisory District	Citywide

REQUEST

Brief Project Description

Purchase 3 pieces of street repair and cleaning equipment to replace equipment that has exceeded its useful life, including 1 full size street sweeper, 2 full size electric pickup truck, and 1 10-wheel dump truck. All requested equipment is California Air Resources Board compliant and meet current emissions standards.

Detailed Scope, Project Benefits and Community Outreach

San Francisco Public Works requests \$983,021 from the Prop K Street Repair and Cleaning Equipment category, which funds replacement of street repair and cleaning equipment such as asphalt pavers, dump trucks, street sweepers, front-end loaders and other equipment for street repair and maintenance. The Fiscal Year 2022/23 request would fund purchase of the following Street Repair and Cleaning Equipment:

- 1 Full Size Street Sweeper
- 2 Full Size Electric Pickup Truck
- 1 10-Wheel Dump Truck

The requested equipment are replacing equipment that have exceeded their useful life and will improve safety at the worksite and improve the efficiency of street cleaning and repair work. All the equipment will have the newest safety features available. The regenerative air sweepers are for street cleaning. The 10-wheel dump truck is for street repair and cleaning up a large amount of debris dumped on the streets.

All requested equipment is compliant with current California Air Resources Board (CARB) emissions standards.

Current PROP K Request:	\$637,680
Supervisory District	Citywide

REQUEST

Brief Project Description

San Francisco Public Works is responsible for repairing sidewalks around City-maintained trees, adjacent to City properties, and at the angular returns of all intersections. A portion of the Tree Maintenance Fund established by Prop E (approved in 2016) will be used to repair sidewalks damaged by City-maintained trees. The requested Prop K funds will be used to repair non tree-related damage to public sidewalks, curb and gutters, and angular returns at approximately 560 locations, including approximately 2,100 linear feet of curb and gutter repairs.

Detailed Scope, Project Benefits and Community Outreach

San Francisco Public Works (SFPW) currently has a backlog of requested repairs to damaged public sidewalks, curbs and gutters, and angular returns not related to street tree damage. Instead, damage at these locations is typically caused by trucks driving up on curbs, old age, heavy equipment, vehicular accidents, poor original construction. There are more than 1717 outstanding repair requests for damaged sidewalks, curbs and gutters throughout the City. See attached list of outstanding repair locations, which will be used to identify work for this funding request. At a cost of \$26.05 per square foot, SFPW expects the scope of the subject request to include repair of approximately 560 sidewalk locations. The average cost per linear foot of curb and gutter (which involves pouring 12-18" of gutter as well as 6-10" of curb) is \$52.35 per linear foot, and the subject request will repair approximately 1900 linear foot of curb.

Locations are determined by data from the street tree census, SFPW inspections and public complaints and will be prioritized according to the criteria in the 5-Year Prioritization Program (5YPP) for the Prop K Pedestrian and Bicycle Facility Maintenance category, including pedestrian volume, proximity to vulnerable populations (senior centers, hospitals), proximity to bus stops, project readiness, community support, and time-sensitive urgency. In addition to these locations, SFPW anticipates that emergency response may be required at sidewalks fronting federal, state, school, and housing authority properties, as well as fronting undeveloped lands, roadway structures (i.e.

E5-38

stairways, tunnels, bridges and retaining walls), and special surface sidewalks such as Market Street bricks and Mission Street tiles. Any substitutions of locations would be made in accordance with the 5YPP prioritization criteria. SFPW will provide the number of sidewalk and curb repairs completed and the list of repair locations as part of the project progress reports, noting the locations identified through service requests and claims data.

New locations continuously become priorities as a result of SFPW's ongoing inspections, daily complaints, and reports of trip-and-fall accidents. The locations identified in the current prioritized sidewalk repair list may change based on higher need locations that cannot be anticipated at this time. SFPW has the flexibility to prioritize and complete locations on an expedited basis if there is a potential significant impact to pedestrian access and/or have the highest likelihood of generating claims against the City and County of San Francisco (CCSF). Failure to correct sidewalk deficiencies, whether they front public or private properties, increases CCSF's exposure to claims and lawsuits resulting from trip-and-fall injuries.

SFPW sidewalk inspectors will continue to respond to public complaints through 311 about public sidewalks.

Allocation Request Form

FY of Allocation Action:	FY2022/23
Project Name:	Tree Planting and Establishment
Grant Recipient:	Department of Public Works

EXPENDITURE PLAN INFORMATION

PROP K Expenditure Plans	Tree Planting & Maintenance
Current PROP K Request:	\$1,548,980
Supervisory District	Citywide

REQUEST

Brief Project Description

Public Works requests Prop K Tree Planting and Maintenance category funds programmed in FY22-23 to plant and establish trees with City crews and community partners. Public Works will plant 660 trees and add them to the weekly watering schedule for 3 years of establishment. The trees will then receive lifetime maintenance care through StreetTreeSF's guaranteed funding from the General Fund.

Detailed Scope, Project Benefits and Community Outreach

Public Works' Bureau of Urban Forestry maintains a Tree Database, which is updated on a daily basis by tree inspectors as new trees are planted and more locations are inspected. In addition to new tree locations, sites where trees have been removed and other empty tree basins are also prioritized. The list of priority locations is continuously updated as there are many more empty tree basins/missing trees throughout the City, including recently removed trees, but listed locations have been inspected and found to be free of utility conflicts. The Tree Planting program is working counter-clockwise around the City through priority areas characterized by low levels of tree canopy. In recent years the program has focused on District 11, which was a low canopy area that that now has extensive new plantings. The program is currently focusing on Bayview-Hunters Point in District 10. Next, the program will turn its attention to the Tenderloin and SOMA areas where tree canopy levels are some of the lowest in the City. Open basins have been identified among the locations in the attached lists and SFPW will plant those while continuing to water in D11 and D10 using the grant funds.

With a robust municipal tree care program through StreetTreeSF, Public Works is closing the gap on deferred street tree maintenance needs in the public right-of-way. However, the removal of dead, declining, and hazardous trees is creating a growing number of empty tree basins despite the SF Urban Forest Plan's goal of increasing the canopy from 125,000 to 155,000 trees. Using Prop K funds, 15 gallon and 24 inch box trees are planted and staked with TreeGator watering bags that are filled weekly by staff with watering trucks for the first 3 years to establish. Most trees are now being installed with hardware cloth screens as protection from vandalism. Public Works expects to use Prop K funds primarily to establish trees planted by City crews and partners like Friends of the Urban Forest using other capital and grant funds.

E5-70

Data shows that the current number of trees sequesters over 19 million pounds of carbon dioxide and filters more than 100 million gallons of stormwater every year. Replacing trees in empty tree basins with climate-adapted, drought-tolerant trees will add to this public good, as well as improve walkability of streets, calm traffic, and raise property values.

SCHEDULE DETAILS

Public Works will work with partners like Friends of the Urban Forest to complete this work by planting trees, participating in community meetings, and coordinating with District Supervisor offices to notify residents of upcoming tree planting projects. Public Works will partner with the Clean City Coalition and is exploring new partnerships to aid in watering all our young trees.

REQUEST

Brief Project Description

The Duboce Triangle Neighborhood Association is working with the District 8 office to support two UC Berkeley students to run community workshops and develop concept designs for "Vision Slow Triangle" based on research they have already conducted on walkability and mobility, sustainability, and public space activation. This project, requested by Commissioner Mandelman, includes the following deliverables: Public Realm Design Values & Guidelines and Critical Concept Designs for locations around the neighborhood, including the intersections of Duboce and Sanchez and Noe and Sanchez.

Detailed Scope, Project Benefits and Community Outreach

Background on Vision Slow Triangle:

As the pandemic paused commuter traffic, San Francisco rolled out Slow Streets. New traffic patterns tested the patience of some and stretched the imagination of others.

In keeping with its history as an organization with a reputation for progressive thinking, the Duboce Triangle Neighborhood Association (DTNA) started a conversation about a Slow Triangle: "At the risk of sounding crazy, let's make the entire Triangle neighborhood slow?" proposed a neighbor at the monthly DTNA Land Use Meeting. "That's a 'vision', an 'idea to be explored' said the Land Use chairperson, thus creating an opportunity for both creative exploration and disagreement to take its space. So, the organization started exploring.

In hopes of bringing some objective criteria and professional eyes to bear, DTNA approached Professor Zach Lamb at the College of Environmental Design at UC Berkeley. Professor Lamb proposed that students under the guidance of Ph.D. candidate Tyler Pullen research various aspects of the Vision: Slow Triangle as part of his course in Urban Design Research Methods.

In fall 2021, three student groups commenced their research covering three topics: Walkability & Mobility, researching the impact of parking configurations on traffic calming and the public realm; Sustainability, researching how characteristics of streetside gathering spaces (vegetation, amenity, size and dimension, location) encourage resident use and contribute to resident satisfaction; and

E5-80

Activation, researching how physical characteristics and vehicular traffic influence the desire of pedestrians to use streets. The students presented the findings of their research work to the community at DTNA Land Use and General meetings, both of which saw record attendance from the community, local administrators, and policymakers.

After rich and robust conversations at the various meetings, the research has become the basis for implementing improvements to the public realm in the Triangle, as well as sparking new conversations about the ownership of rights to, and responsibilities for, the public realm. To many, it became clear that directing the neighborhood's energy towards working on the public realm can ultimately create a new sense of community, which addressed a concern felt by many during the Covid pandemic that we had lost touch with those who live closest to us.

In February 2022, DTNA board members toured the neighborhood with district supervisor Mandelman, representatives from the San Francisco Municipal Transportation Agency, and the San Francisco Planning Department to share the research findings and discuss the implementation of recommendations from the student work.

Deliverables:

DTNA anticipates two deliverables to be delivered over a two-month time frame:

1. Public Realm Design Values: A community-endorsed yardstick for making decisions affecting the design of the public realm in the Triangle.

- Hold preliminary listening sessions for community members (and/or with specific DTNA committees);
- Highlight frequent trade-offs and unintended consequences/externalities of certain design values/decisions;
- Develop a slide show of precedent case studies of similar interventions in SF, CA, and elsewhere to generate ideas and discussion (could be after the first meeting and before a second);
- Hold a second meeting to solicit feedback on precedents and draft articulation of key values;
- Refine values.

2. Critical Concept Designs: Design concepts for the (a) reconfiguration of the intersection of Duboce and Sanchez and (b) bulb-outs, parklets, and traffic calming measures on Noe and Sanchez.

- Overall area plans/diagrams for the whole DTNA area;
- Streetscape plans for key intersections and streets;
- Street section drawings;
- Positioning & thematic differentiation of various areas under (b)
- Activation proposals as appropriate (e.g. food, art, exercise etc)
- Detail plans/sections of particular interventions especially the areas under (b);
- Photomontages or other user-eye renderings of before and after streetscapes;

3. Final Report

The Transportation Authority's Neighborhood Program (NTIP) is intended to strengthen project pipelines and advance the delivery of community supported neighborhood-scale projects, especially in Communities of Concern and other neighborhoods with high unmet needs.

Current PROP K Request:	\$300,000
Supervisory District	District 01

REQUEST

Brief Project Description

The District 1 Multimodal Transportation Study (NTIP), requested by Commissioner Chan, will engage the community to identify known mobility challenges and develop up to three near- to medium-term concepts to improve transit reliability and pedestrian and bicycle safety. In addition to these strategies, the study will also identify trip patterns and markets for trips within District 1 that have a high potential for mode shift and identify one high-level concept to support modeshift for trips that start and end within the District.

Detailed Scope, Project Benefits and Community Outreach

Task 1: Existing Conditions

This study will focus on addressing known challenges of the multimodal transportation system and developing a deeper understanding of trip making within the District.

- Past plans, recent improvements, and upcoming projects will be reviewed to clearly identify known transit, street safety, and transportation barriers and, to the extent possible, the impact of past improvements.
- Neighborhood travel patterns will also be documented to support long-term mode shift using findings from past planning efforts, known destinations (e.g schools, open space, hospitals, commercial corridors, etc.).

The Existing Conditions report will include maps to synthesize the findings and support later rounds of outreach.

Deliverables:

- Draft and Final Existing Conditions report

Task 2: Community Engagement

Community engagement will take place during three periods of the project and will include a combination of community meetings and surveys.

- Round 1 will take place after the completion of Task 1 to identify missing needs, focus areas, and trip patterns for trips that start and end within the District.

E5-88

- Round 2 will be take place between Task 3 and Task 4; the project team will share potential interventions to address known needs and seek to identify their relative priorities
- Round 3 will share the final recommendations

Outreach will be multi-language and community-based, especially with key community stakeholders who may be instrumental in ensuring a sufficient pilot funding strategy.

Task 2.1: Agency Coordination

The project team will coordinate with SFMTA and SFDPW throughout the project to ensure consistency between past studies and planned projects and that concepts are feasible.

Deliverables: Outreach Plan memorandum; Communications materials; Summary of outreach feedback

Task 3: Identify Interventions to Address Known Needs

Interventions will be developed based on the findings from Task 1 and the first round of community engagement to improve transit reliability and pedestrian and bicycle safety and reduce the drive along more share for trips that start and end within the district. Interventions will be tied to general areas of District 1 to guide concept development

- Transit priority interventions may include transit lanes, signal priority, passenger access and boarding improvements along key transit routes (e.g. Muni 18-46th Ave, 5-Fulton).
- Pedestrian and bicyclist safety improvements would be centered on complete streets and may include speed management, sight lines, or streetscape improvements.
- High-level interventions will also be identified to support neighborhood travel patterns and trips markets to support mode shift.

Each intervention will include a relative cost, feasibility, and ability to support trips that start and end within the district.

Deliverables: Memo of potential interventions

Task 4: Concept Development

Building on the second round of outreach, the project team will identify the top interventions for advancement in this task. A set of concepts will be developed for up to three near- to medium-term improvements to support transit reliability and pedestrian and bicycle safety within District 1 and up to one long-term concept will be developed to support neighborhood travel patterns and markets. Concepts will include a relative cost, feasibility, ability to support trips that start and end within the district, and considerations for advancement.

Deliverables: Intervention refinement process, Draft and Final concepts

Task 5: Final Report

A final report will be developed to document existing conditions, public outreach, and concept development. The final report will include costs associated with each concept, as well as potential funding opportunities.

Upon completion (anticipated December 2023), staff will present the draft final report, including key findings, recommendations, next steps, implementation, and costs and funding, to the Board for approval

Deliverables: Draft and final report, including cost estimates and funding opportunities

The Transportation Authority's Neighborhood Program (NTIP) is intended to strengthen project pipelines and advance the delivery of community supported neighborhood-scale projects, especially in Communities of Concern and other neighborhoods with high unmet needs.
