REQUEST

Brief Project Description

The San Francisco Unified School District (SFUSD) is developing a new elementary school, Mission Bay School, at the intersection of 6th Street and Mission Bay Boulevard South. The requested NTIP funds will be used to analyze connectivity between the school site, the existing active transportation network, and existing/planned transit, and then design and implement infrastructure improvements to mitigate 1-2 key barriers to active transportation. The project will also coordinate expected transportation programs and improvements from adjacent developments to ensure school access is supported.

Detailed Scope, Project Benefits and Community Outreach

Background

The San Francisco Unified School District (SFUSD) is developing a new elementary school, Mission Bay School, at the intersection of 6th Street and Mission Bay Boulevard South. SFSUD anticipates completing construction in June 2025 and opening the new school in August 2025. This project will analyze connectivity between the school site, the existing low-stress active transportation network, and existing/planned transit, and then design infrastructure improvements to mitigate 1-2 key barriers to active transportation. The project will also coordinate expected transportation programs and improvements from adjacent developments to ensure school access is supported.

The project is informed by the emerging finding from San Francisco's district-wide School Access Plan that caregivers want investment in infrastructure which supports safer school trips. The project will also advance the goal of San Francisco's Safe Routes to School Program to reduce the proportion of school trips made in a single-family vehicle to 30% by 2030.

The Transportation Authority's Neighborhood Program (NTIP) is intended to strengthen project pipelines and advance the delivery of community supported neighborhood-scale projects, especially in Equity Priority Communities and other neighborhoods with high unmet needs. Commissioner Dorsey has expressed support for using the \$319,307 in District 6 NTIP funds included in this request.

Scope of Mission Bay School Access Plan

Task 1 - Project Management

Manage all project activities and required reporting.

- Deliverables: Quarterly Progress Reports
- Lead Agency: San Francisco County Transportation Authority (SFCTA). SFCTA will contract with the consultant.

Task 2 - Outreach

The study will build on outreach conducted by SFUSD through the school development process. Outreach will involve conversations with community groups in addition to one workshop and one online town-hall intended for the general public. Outreach will also include coordination with The University of California San Francisco (UCSF) which plans do develop several parcels adjacent to the planned school. UCSF also operates a shuttle service near the school site. The study will coordinate with UCSF to ensure transportation programs and future improvements support school access.

- Deliverable: Outreach Summary Memorandum
- Lead Agency: SFCTA. SFCTA will contract with the consultant.

Task 3 - Goals and Existing Conditions

The study team will draft an Existing Conditions Report which documents current transportation conditions, services, and planned improvements near the school site.

In parallel with the Existing Conditions Report, the study team will review and refine study goals, then develop a Goals and Objectives Framework (G&O Framework). The G&O Framework will be used to guide discussions with UCSF about shuttle service and planned nearby developments. It will also be used to guide the development of, then evaluate concepts developed in Task 4.

- Deliverables: Goals and Objectives Framework and Existing Conditions Report
- Lead Agency: SFCTA

Task 4 - Concept Development

The study team will review the existing conditions report developed in Task 3 and identify 1-2 key barriers to active transportation connectivity near the school site. The study will develop 5% conceptual designs for improvements to the key barriers identified. The study team will also identify a broader package of active transportation improvements which connect the school site to the active transportation network and transit networks along low-stress routes.

- Deliverable: Draft Concepts Memorandum
- Lead Agency: San Francisco Municipal Transportation Agency (SFMTA)

Task 5 - Concept Evaluation and Cost Estimates

The team will develop rough order of magnitude cost estimates for potential improvements developed in Task 4, then use the G&O Framework developed in Task 3 to evaluate alternatives. The study is not expected to conduct detailed traffic analysis. The project team will use evaluation results to recommend a suite of transportation improvement concepts.

- Deliverables: Concept Evaluation and Cost Estimate Matrices
- Lead Agency: SFMTA

Task 6 - Report, Recommendations, and Implementation Plan

The study team will compile deliverables from previous tasks and document recommendations in a Final Report. This report will include recommendations for improvements to active transportation connectivity which address 1-2 key barriers and which connect the school site to existing active transportation and transit networks. The final report will also document transportation improvements

planned through nearby UCSF developments. Recommendations will include a funding and implementation plan.

- Deliverables: Draft and Final Report; Presentation to SFCTA Board for final decision
- Lead Agency: SFCTA

Implementation of Recommendations [SFMTA Task]

This allocation request includes \$90,000 in funding to implement the study recommendations. The SFMTA will prioritize and identify recommended improvements for up to a total cost of \$90,000. Improvements will be prioritized based on need, cost, and time to implement. The implementation cost may include environmental review, design, or construction and construction may be a combination of quick-build or permanent construction.

Project Location

Roads within approximately 1/4 mile of the planned school site at 6th Street / Mission Bay South

Project Phase(s)

Planning/Conceptual Engineering (PLAN), Design Engineering (PS&E), Construction (CON)

Justification for Multi-phase Request

Multi-phase allocation recommended to allow the Transportation Authority to fully allocate District 6 NTIP funds prior to the sunset of the Prop K Expenditure Plan on March 31, 2023.

5YPP/STRATEGIC PLAN INFORMATION					
Type of Project in the Prop K 5YPP/Prop AA Strategic Plan?	New Project				
Is requested amount greater than the amount programmed in the relevant 5YPP or Strategic Plan?	Less than or Equal to Programmed Amount				

Justification for Necessary Amendment

Fully funding this request requires an amendment to the Traffic Calming 5YPP to reprogram \$220,000 from Schools Engineering Program and \$9,307 from Vision Zero Proactive Traffic Calming to the subject project and an amendment to the Pedestrian Circulation and Safety 5YPP to reprogram \$90,000 from NTIP Placeholder to the subject project. Schools Engineering Program has an unused fiscal year of funding available due to the pause of in person learning during the COVID-19 emergency. Current Vision Zero Proactive Traffic calming improvements are being delivered via separate approaches, such as the Bayview Community Based Transportation Plan. Funding for Schools Engineering Program and Vision Zero Proactive Traffic Calming will be prioritized by SFMTA for Prop L programming.
