Board
November 13, 2018

2019 PROPOSITION K
5-YEAR PRIORITIZATION PROGRAM

PEDESTRIAN CIRCULATION AND SAFETY

Pending Board Approval: November 27, 2018

Prepared for the San Francisco County Transportation Authority

By San Francisco Municipal Transportation Agency

In Coordination with Bay Area Rapid Transit (BART), Department of Public Works, and
Peninsula Corridor Joint Powers Board (PCJPB or Caltrain)

SAN FRANCISCO COUNTY TRANSPORTATION AUTHORITY

1455 Market Street, 22nd Floor, San Francisco, CA 94103

- 2014 Prop K 5-Year Prioritization Program – Program of Projects (as proposed)

Eligibility

Eligibility as identified in the voter approved Prop K Expenditure Plan is as follows:

“Pedestrian Circulation and Safety: Programmatic improvements to the safety and usability of city streets for pedestrians, prioritized as identified in the Pedestrian Master Plan. Includes flashing pavement reflectors on crosswalks, pedestrian islands in the medians of major thoroughfares, sidewalk bulb-outs, sidewalk widening, and improved pedestrian circulation around BART and Caltrain stations. Includes project development and capital costs. Sponsoring agencies: DPT, MUNI, SFPW, BART, PCJPB. The first \$23.8 M is Priority 1. The next \$1.2 million is Priority 2, and the remainder is Priority 3. Total funding: \$69.7 million; Prop K: \$52.0 M.”

DPT stands for Department of Parking and Traffic, and MUNI for San Francisco Municipal Railway. DPT and MUNI are now under the San Francisco Municipal Transportation Agency (SFMTA). DPW, now referred to as SFPW, stands for Department of Public Works, BART for Bay Area Rapid Transit, and PCJPB for Peninsula Corridor Joint Powers Board (Caltrain).

Prioritization Criteria

One of the key required elements of the 5YPPs is a transparent process for how projects get selected. Prop K requires at a minimum that each category include prioritization criteria that address project readiness, community support, and relative level of need or urgency. For the 2014 5YPP update, the Citizens Advisory Committee requested that the Transportation Authority and project sponsors develop a user-friendly, transparent scoring table that could apply to all 5YPPs, and that the scoring prioritize safety and community input highly. For the 2019 5YPP update, the prioritization criteria and scoring

are unchanged. Table 3 shows the Prioritization Criteria and Scoring Table. Each project can receive a maximum of 20 points, with 10 points allocated for programwide criteria and 10 points allocated for category specific criteria.

The Expenditure Plan also requires consideration of geographic equity in terms of project distribution that takes into account the various needs of San Francisco's neighborhoods. In the 2019 5YPP for this category, SMTA is proposing to use Prop K funds on projects improving safety on the Vision Zero High Injury Network throughout the City. Vision Zero is San Francisco's policy to eliminate traffic fatalities by 2024. In order to invest resources where injuries are most concentrated, Vision Zero focuses on the City's High Injury Network, which represents 12.8% of street miles and accounts for 61% of severe and fatal injuries.

Stretching Your Prop K Sales Tax Dollars Farther

Leveraging Prop K funds against non-Prop K fund sources (e.g., federal, state, other local funds) is necessary to fully fund the Expenditure Plan projects and programs. For the Pedestrian Circulation and Safety category, the Prop K Expenditure Plan assumes that for every \$1 of every dollar of sales tax revenue spent, it would be leveraged by about \$0.34 in non-Prop K funds. The table below compares Prop K Expenditure Plan assumptions with proposed leveraging in the 2019 5-year project lists.

Table 1. Prop K Leveraging¹

Category	Expected Leveraging (Non-Prop K Funds)	Proposed Leveraging (Non-Prop K Funds)
Pedestrian Circulation and Safety	25%	84.8%

¹ This table compares the expected leveraging assumed in the Expenditure Plan with the proposed leveraging assumed in the 5-Year Project List.

This category includes a placeholder for NTIP projects that is not reflected in the proposed leveraging calculation. The actual leveraging will be known once NTIP projects are identified and prioritized for these funds.

Performance Measures

Prop K requires the establishment of performance measures for each programmatic category in the Expenditure Plan. The intent is to demonstrate the system performance benefits of sales tax projects (e.g. reduced transit travel time), to ensure funds are being used cost effectively, and to inform allocation of Prop K funds and programming and prioritization of other funds by the Transportation Authority (e.g. Transportation Fund for Clean Air, Prop AA Vehicle Registration Fee funds).

The goals of the projects within this category are to improve walking safety, accessibility, convenience, and comfort. In order to monitor progress toward achieving these goals, the

SFMTA has developed performance measures as part of the Vision Zero Two-Year Action Strategy. The following performance measures enumerate actual infrastructure installed for improving safety.

1. Number of miles of safety treatments installed on the High Injury Network
2. Percentage of safety treatment miles installed in Communities of Concern
3. Number of intersections improved with accessible (audible) pedestrian signals
4. Number and percent of signalized intersections with pedestrian countdown signals

In addition to the pedestrian facility improvements funded through Prop K, there are many other factors that influence safety and circulation. For example, pedestrian circulation is largely linked to land use patterns, and pedestrian safety is impacted by traffic volumes, enforcement actions, and outreach/education programs that are outside of the scope of this Prop K funding category.

**Table 2. Project Delivery Snapshot
Pedestrian Circulation and Safety**

5-Year Prioritization Program (5YPP) Period *		Programmed (Available for Allocation)	Total Allocated	% Allocated
2005 5YPP (FY 2004/05-2008/09)	\$ 3,704,493	\$ 2,310,995	18%	
2009 5YPP (FY 2009/10-2013/14)	\$ 5,464,862	\$ 3,691,465	29%	
2014 5YPP (FYs 2014/15 - 2018/19) as of 7/24/2018	\$ 8,328,058	\$ 6,916,974	54%	
Total	\$ 12,919,434			

*Unallocated funds are carried forward for programming in the following 5YPP period.

Tables show allocations and percent complete through June 30, 2018, based on project sponsors' progress reports.

Locations will be scored at the time of allocation. See text and Project Information Form for more details.

Locations will be scored at the time of allocation. See text and Project Information Form for more details.

Prioritization Criteria Definitions:

Project Readiness: Project likely to need funding in fiscal year proposed. Factors to be considered include adequacy of scope, schedule, budget and funding plan relative to current project status (e.g. expect more detail and certainty for a project about to enter construction than design); whether prior project phases are completed or expected to be completed before beginning the next phase; and whether litigation, community opposition or other factors may significantly delay project.

Community Support: Project has clear and diverse community support and/or was it identified through a community-based planning process. An example of a community-based plan is a neighborhood transportation plan, but not a countywide plan or agency capital improvement program.

Three points for a project in an adopted community based plan with evidence of diverse community support.

Two points for a project with evidence of support from both neighborhood stakeholders and groups and citywide groups.

One point for a project with evidence of support from either neighborhood stakeholders and groups or citywide groups.

Time Sensitive Urgency: Project needs to proceed in proposed timeframe to enable construction coordination with another project (e.g. minimize costs and construction impacts), to support another funded or proposed project (e.g. new signal controllers need to be installed to support IEP implementation) or to meet timely use of funds deadlines associated with matching funds.

Safety: (One point for each): Project addresses documented safety issue; reduces potential conflicts between modes; and increases security.

High Injury Corridor: Project is located on the 2017 Vision Zero High Injury Network.

Provides Benefits to Multiple Users: Project receives one point each for addressing the needs of bicyclists, motorists and/or transit users.

Leveraging: Project leverages non-Prop K funds.

Prop K Project Information Form		
Project Name:	Grove Street/Civic Center Improvements	
Implementing Agency:	San Francisco Municipal Transportation Agency	
Prop K Expenditure Plan Information		
Category:	C. Street & Traffic Safety	
Subcategory:	iv. Bicycle and Pedestrian Improvements	
EP Line (Primary):	39-Bicycle Circulation/Safety	
Other EP Line Number/s:	40-Pedestrian Circulation/Safety	
Fiscal Year of Allocation:	2019/20, 2021/22	
Project Information		
Project Location:	Grove Street between Octavia Boulevard and Market Street.	
Supervisoral District(s):	District 06, District 05	
Project Manager:	Matt Lasky	
Phone Number:	701-5228	
Email:	matt.lasky@sfmta.com	
Brief Project Description for MyStreetSF (80 words max):	Design and construct bicycle and pedestrian improvements on Grove Street between Octavia Boulevard and Market Street.	
Detailed Scope (may attach Word document): Please describe the project goals, scope, benefits and how the project was prioritized. Also, describe any coordination with other projects (e.g. paving, MuniForward, Vision Zero).	Project will implement bicycle and pedestrian improvements on Grove Street between Octavia Boulevard and Market Street. Project includes street design and roadway changes that correlate with the circulation and collision patterns of the area, as well as data analysis, additional outreach, and preparation of conceptual designs for the final plan document. SFMTA will implement several near-term improvements based on analysis of key conflict areas and opportunities effective safety improvements. Following the environmental clearance of the project, SFMTA will work with Public Works to implement more detailed proposed changes.	
Prior Community Engagement/Support (may attach Word document): Please reference any community outreach that has occurred and whether the project is included in any plans (e.g. neighborhood transportation plan, corridor improvement study, station area plans).	Under the direction of SF Planning, the Civic Center Public Realm Plan will create recommended improvements in the City Hall/Civic Center area. Public engagement process, consists of two workshops, online survey, and mobile outreach station to date, and a final open house in Fall 2018. https://civiccentersf.org/about/outreach/	
Partner Agencies: Please list partner agencies and identify a staff contact at each agency.	SFPW-John Dennis SF Planning-Nick Perry	
Type of Environmental Clearance Required:	Categorically Exempt	
Attachments: Please attach maps, drawings, photos of current conditions, etc. to support understanding of the project.	No

Other EP Line Number/s:		
Fiscal Year of Allocation:	2020/21	
Project Information		
Project Location:	Howard between 3rd Street and 11th Street and Folsom between 2nd Street and 11th Street.	
Supervisorial District(s):	District 06	
Project Manager:	Paul Stanis	
Phone Number:	415.701.5396	
Email:	Paul.Stanis@sfmta.com	
Brief Project Description for MyStreetSF (80 words max):	Implementation of better, safer streets on Howard Street between 3rd Street and 11th Street and on Folsom Street between 2nd Street and 11th Street, including improvements to bicycle, pedestrian and transit facilities, upgrades to traffic signals, traffic circulation modifications, and changes to parking and loading.	
Detailed Scope (may attach Word document): Please describe the project goals, scope, benefits and how the project was prioritized. Also, describe any coordination with other projects (e.g. paving, MuniForward, Vision Zero).	Implementation of better, safer streets on Howard Street between 3rd Street and 11th Street and on Folsom Street between 2nd Street and 11th Street, including improvements to bicycle, pedestrian and transit facilities, upgrades to traffic signals, traffic circulation modifications, and changes to parking and loading. Project will redesign street couplets that are the cornerstone of the growing SoMa neighborhood. Improvements will include protected bicycle facilities; new corner bulbs and transit islands at intersections reducing pedestrian crossing distances and improving Muni service; transit-only lanes; new signals at midblock locations or alleyways; and construction of raised crosswalks at alleyways.	
Prior Community Engagement/Support (may attach Word document): Please reference any community outreach that has occurred and whether the project is included in any plans (e.g. neighborhood transportation plan, corridor improvement study, station area plans).	The EN TRIPS effort and the Central Corridor/Central Soma Plan, included robust community outreach and led to recommendations in the project area. While outreach for the project is ongoing, it has already been some of the most extensive ever done on an SFMTA streetscape project. For both the long-term and near-term components, three series of open houses were held comprising six total public meetings attended by over 300 people. Together with online responses and in-person outreach in conjunction with community groups, those efforts generated 1,300 survey responses, many of which were collected in Filipino. The team canvassed the corridor's local businesses, knocking on all 165 doors that were identified as business locations. The team has met with over 75 businesses and 20 different community groups since the beginning of the project. The SFMTA has performed concentrated, in-depth outreach to relevant stakeholders to allow the SFMTA to work directly with community-based organizations to obtain further community input from within the SoMa Youth and Family Zone to explore how the Folsom and Howard re-designs can best address pedestrian safety and access to the community assets (e.g. schools, recreation centers, etc.) within the Zone. Tasks from this Prop K NTIP-funded effort include initial stakeholder interviews with Youth and Family Zone leadership, public open houses, and follow-up meetings with stakeholders.	
Partner Agencies: Please list partner agencies and identify a staff contact at each agency.	SFPW - Kelli Rudnick	
Type of Environmental Clearance Required:	Categorically Exempt	
Attachments: Please attach maps, drawings, photos of current conditions, etc. to support understanding of the project.	Yes	Fact sheet; https://www.sfmta.com/projects/folsom-howard-streetscape-project

FOLSOM-HOWARD STREETSCAPE PROJECT

Streetscape Project Factsheet (Winter 2018)

SFMTA.COM/FOLSONHOWARD

Why Improve Folsom and Howard Streets?

Folsom and Howard are a part of the High Injury Network, the 12 percent of city streets with 70 percent of the severe and fatal collisions.

Over the last 5 years, 3 people were killed and 308 people were injured on Folsom and Howard streets including:

- 1 Pedestrian fatality on Howard
- 1 Bicyclist fatality on Folsom
- 1 Bicyclist fatality on Howard

What Will The Project Do?

The Folsom-Howard Streetscape Project will make SoMa more livable by making it safer and more pleasant to walk, bike, shop and live along Folsom St. from 11th to 2nd and Howard St. from 11th to 3rd. The project will:

- Improve safety for all users of the corridor
- Make biking and walking in SoMa a more comfortable experience
- Improve loading for local businesses
- Give transit services priority and elevate their use on the corridor

Near-Term Safety Improvements We Have Already Made

While we design long-term changes, we installed parking-protected bikeways, daylighted intersections, and added transit boarding islands on Folsom from 11th to 5th to improve safety.

These improvements **support San Francisco's Vision Zero goal of eliminating traffic fatalities**. These changes will improve transit, protect pedestrians and bicyclists by **shorten crossing distances and provide more visibility for pedestrians and provide dedicated, protected space for bicyclists**.

SFMTA Board approved the changes in October 2017. Construction began in Fall 2017 and will finish in January 2018.

Changes To Improve Pedestrian, Bicycling and Transit Infrastructure, Comfort and Safety

The proposals for the streets **prioritize people by making it safer and more pleasant to walk, bicycle, and take transit on Folsom and Howard**. The project will also provide opportunities for greening and public space improvements.

Changes that will **improve San Franciscan's ability to walk comfortably** on this commercial corridor include:

- Sidewalks widening from 8th to 4th on Folsom's north side
- 3 new mid-block crossings on Howard and 4 on Folsom
- Adding daylighting, bulb-outs, pedestrian head-starts

Bike improvements build on the parking-protected bikeway just installed on Folsom, **adding barriers, improving intersections and increase connectivity**. Changes include:

- New parking-protected bikeway on Howard
- Two-way biking on Folsom between 8th and 11th connecting riders with bike routes in the Mission
- New traffic signals that separate turning vehicles and bikes

We will bring a **transit only lane to Folsom**, that coupled with increased service, will **decrease travel times for riders** and provide **better transit connections throughout SoMa**.

These changes require reducing parking by 33% on Folsom and Howard but only **reduce parking by 9% in a one block radius**.

Working with Local Business on Loading

Folsom and Howard only work if they work for local businesses. After meeting with more than 75 business, we have heard significant concerns about loading. To address these concerns, **near-term improvements doubled the number of loading zones on Folsom Street** to respond to businesses needs for additional space.

We will continue to work with the business community for the long-term project to try to improve loading along both Folsom and Howard.

Next Steps:

- Near-term Improvements Completed - Winter 2018
- Public Outreach and Open Houses - Winter and Spring 2018
- Planning Certifies Central SoMa EIR - Summer 2018 (tentative)
- SFMTA Board of Directors Approval - Summer 2018 (tentative)
- Detailed Design - 2018 to 2019 (tentative)
- Construction - 2020 -2023 (tentative)

Prop K Project Information Form	
Project Name:	Lake Merced Pedestrian Safety
Implementing Agency:	San Francisco Municipal Transportation Agency

Brief Project Description for MyStreetSF (80 words max):	Improve safety for pedestrians crossing Lake Merced Boulevard between Font and Sunset Boulevards. Recommendations to be identified through a community based transportation planning process could include new traffic signals or beacons, enhanced crosswalks, pedestrian visibility improvements and transit stop amenities focused on safety.
Detailed Scope (may attach Word document): Please describe the project goals, scope, benefits and how the project was prioritized. Also, describe any coordination with other projects (e.g. paving, MuniForward, Vision Zero).	<p>Improve pedestrian crossings across Lake Merced Boulevard between Font and Sunset Boulevards. This segment is part of the Vision Zero High Injury Network, and would improve access to a major recreational site. Scope of the planning phase will include community outreach to understand current walking patterns and barriers, as well as collision and traffic patterns and an assessment of requirements to update the transit stops up to or beyond minimum standards. Recommendations from the planning phase could include new traffic beacons, enhanced crosswalks, pedestrian visibility improvements and transit stop amenities focused on safety.</p> <p>As required by Community Based Transportation Plan guidelines, the planning phase includes the formation of a community steering committee, outreach activities focused on the communities of concern that are served by the project area, establishing baseline conditions, performing a needs assessment, and developing a prioritized list of projects and implementation plan.</p>
Prior Community Engagement/Support (may attach Word document): Please reference any community outreach that has occurred and whether the project is included in any plans (e.g. neighborhood transportation plan, corridor improvement study, station area plans).	As required by Community Based Transportation Plan guidelines, the planning phase includes the formation of a community steering committee and outreach activities focused on the communities of concern that are served by the project area.

As a Congestion Management Agency for San Francisco, the Transportation Authority periodically receives community-based transportation planning (CBTP) funds from the Metropolitan Transportation Commission. The CBTP funds are for community based planning efforts focused in Communities of Concern or that primarily benefit Communities of Concern since the last cycle of CBT funding. As a condition of receipt of the CBTP funds, MTC will need to comply with all of MTC's requirements for this grant program.

Planned FY 2019/20 Caltrans Planning Grant application. We would consider a request for local match to a Caltrans Planning Grant from the Prop K Transportation/Land Use Coordination and/or another Prop K category should STMTA be successful in its grant application. Per Caltrans, earliest start date is October 2019.

Prop K Expenditure Plan Information		
Category:	C. Street & Traffic Safety	
Subcategory:	iv. Bicycle and Pedestrian Improvements	
EP Line (Primary):	40-Pedestrian Circulation/Safety	
Other EP Line Number/s:		
Fiscal Year of Allocation:	2022/23, 2023/24	
Project Information		
Project Location:	TBD	
Supervisorial District(s):	TBD	
Project Manager:	Chava Kronenberg	
Phone Number:	415.701.4451	
Email:	chava.kronenberg@sfmta.com	
Brief Project Description for MyStreetSF (80 words max):	Programmatic funds for future projects that are key in the City's focus on Vision Zero, the City's goal to reduce all traffic deaths to zero by 2024.	
Detailed Scope (may attach Word document): Please describe the project goals, scope, benefits and how the project was prioritized. Also, describe any coordination with other projects (e.g. paving, MuniForward, Vision Zero).	Every year about 30 people in San Francisco lose their lives to traffic crashes, and an additional 500 people are severely injured. 61% of these injuries and fatalities occur on 12.8% of San Francisco streets. San Francisco adopted Vision Zero as a policy in 2014 to eliminate traffic fatalities and reduce severe injuries by 2024. Through Vision Zero, San Francisco is committing to build better and safer streets, educate the public on traffic safety, better enforce traffic laws, and adopt policy changes that save lives. Capital investments in pedestrian safety at SFMTA are outlined through the agency's Capital Improvement Program (CIP). Planned capital improvements in the CIP focused on pedestrian safety include both programmatic lines for quick and effective capital work and traffic calming programs, as well as corridor projects such as the 6th Street Pedestrian Safety Improvements project and the Folsom-Howard Streetscape Improvements. This programmatic placeholder would likely be used to advance corridor projects.	
Prior Community Engagement/Support (may attach Word document): Please reference any community outreach that has occurred and whether the project is included in any plans (e.g. neighborhood transportation plan, corridor improvement study, station area plans).	TBD	
Partner Agencies: Please list partner agencies and identify a staff contact at each agency.	TBD	
Type of Environmental Clearance Required:	TBD	
Attachments: Please attach maps, drawings, photos of current conditions, etc. to support understanding of the project.	No

Comments/Concerns

Project is placeholder for capital improvements on the San Francisco Vision Zero High Injury Network. The SFMTA will develop individual project allocation requests, with prioritization, scope, outreach, schedule, budget, and a full funding plan prior to support allocation of Prop K funds.

Brief Project Description for MyStreetSF (80 words max):	The Transportation Authority's Neighborhood Transportation Improvement Program (NTIP) funds community-based neighborhood-scale transportation projects, especially in underserved neighborhoods and areas with vulnerable populations (e.g. seniors, children, and/or people with disabilities). The NTIP has two components: a planning component to fund community-based planning efforts in each Supervisoral district; and a capital component to provide local matching funds for neighborhood-scale projects in each district. This placeholder is for capital funds.	
Detailed Scope (may attach Word document): Please describe the project goals, scope, benefits and how the project was prioritized. Also, describe any coordination with other projects (e.g. paving, MuniForward, Vision Zero).	The Transportation Authority's Neighborhood Transportation Improvement Program (NTIP) funds community-based neighborhood-scale transportation projects, especially in underserved neighborhoods and areas with vulnerable populations (e.g. seniors, children, and/or people with disabilities). The NTIP program came out of the San Francisco Transportation Plan's needs assessment that identified significant unmet demand for pedestrian and bicycle circulation projects and transit reliability initiatives. The NTIP has two components: a planning component to fund community-based planning efforts in each Supervisoral district (\$100,000 for each district over the next 5 years); and a capital component (\$600,000 for each district over the next 5 years) to provide local matching funds for about two neighborhood-scale projects in each district in the next five years. This is the second cycle of the NTIP program. This placeholder is for capital funds.	
Prior Community Engagement/Support (may attach Word document): Please reference any community outreach that has occurred and whether the project is included in any plans (e.g. neighborhood transportation plan, corridor improvement study, station area plans).	NTIP program is specifically designed to be community-based, with priority given to projects in underserved neighborhoods and areas with vulnerable populations (e.g. seniors, children, and/or people with disabilities).	
Partner Agencies: Please list partner agencies and identify a staff contact at each agency.	TBD	
Type of Environmental Clearance Required:	TBD	
Attachments: Please attach maps, drawings, photos of current conditions, etc. to support understanding of the project.	No

FOOTNOTES:

Comprehensive 2014 5YPP Amendment concurrent with 2019 5YPP adoption (Reso XX, approved YYYY).

6th Street Improvements (NTIP): Reduced from \$400,000 to \$0. Project will advance in the 2019 5YPP for the Traffic Calming category.

7th Street Streetscap: Reduced from \$174,000 to \$0. Project was funded through non-Prop K funds.

Follow-the-Paving (Spot Improvements): Reduced \$50,000 to \$0. Project was funded through non-Prop K funds.

WalkFirst: Reduced \$228,996 to \$0. Project was funded through non-Prop K funds.

Neighborhood Transportation Improvement Program (NTIP) Placeholder: Moved \$558,088 from FY 14/15 and FY 15/16 to FY 18/19, with corresponding cash flow adjustment. SFMTA likely to request \$325,000 in FY 18/19 for construction phase of the Elk Street at Sussex Street Pedestrian Safety Improvements [NTIP Capital], fulfilling the commitment to allocate approved by the Board in November 2016.
